

HEBER LIGHT & POWER COMPANY 31 S 100 W Heber City, UT 84032

BOARD MEETING NOTICE & AGENDA

Date: February 26, 2025

Time: 4:00 pm Board Meeting

Location: Heber Light & Power

31 S 100 W, Heber City, UT

Zoom Link:

https://heberpower.zoom.us/webinar/register/WN_q05DOJGsTLCg QwkgasLyVg **Board of Directors:**

Heber City Mayor – Heidi Franco Midway City Rep. – Kevin Payne Charleston Town Mayor - Brenda Christensen Wasatch County Council Rep. - Kendall Crittenden Heber City Council Rep. – Sid Ostergaard Heber City Council Rep. – Aaron Cheatwood

AGENDA

- 1. Approval of Consent Agenda:
 - January 22, 2025, Board Meeting Minutes
 - January 2025 Financial Statement
 - January 2025 Warrants
- 2. Discussion and Possible Decision on Sale of Admin Building-(Adam Long)
- Discussion and Possible Approval of Amended Customer Rules (Rule 3 Types of Electric Service, Rule 11 – Service Connections, and Rule 15 – Line Extensions) (Riley Wright Adam Long)
- 4. Discuss and Review Risk Policys-(Bart Miller)
- 5. Wholesale Power Report- (Emily Brandt)
- 6. Approval of Surplus Equipment Sale- (Jason)

GM Report-

- UAMPS
- IPA
- New Employee update
- Building Update

6:00 p.pm – Public Hearing for the Rate Increase and Rate Implementation

Decision an possible Approval on 2025-2027 Rate Plan

Closed Session: As needed

Agenda Item 1: Consent Agenda Board Minutes

Board Meeting February 26,2025

31 South 100 West Heber City, Utah 84032

BOARD MEETING

January 22, 2025

The Board of Directors of Heber Light & Power met on January 22, 2024, at 4:00 pm at the Heber Light & Power Business Office, 31 S 100 W, Heber City, Utah.

| Board Member Attendance: | Board Chair – Heidi Franco: Present |
|---------------------------------|--|
| | Director – Kevin Payne: Present |
| | Director - Brenda Christensen: Present |
| | Director - Sid Ostergaard: Not Present |
| | Director - Aaron Cheatwood: Present |
| | Director – Kendall Crittenden: Present |

Others Present: Jason Norlen, Bart Miller, Adam Long, Rylee Allen, Emily Brandt, Patricio Hernandez, Jake Parcell, Josh Gustin, Riley Wright and Colby Houghton.

Chair Franco welcomed those in attendance.

1. <u>Consent agenda - approval of a) November 21, 2024, Board Meeting Minutes, b)</u>

<u>November/December 2024 Financial Statements c) November/December 2024 Warrants</u>. Chair Franco asked for the consent agenda to include item 5 Approval of resolution 2025-01 Street Light Energy Charge Forgiveness, item 6 Review of Cash Reserve and Dividend Calculation, item 7 Approval of 2025 Board Meeting Schedule, and item 8 Review and Approval of Fraud Assessment and Completion of Board Ethics Form.

Motion. Director Crittenden moved to add items 5,6,7, and 8 to be included in the Consent

agenda. Director Christensen seconded the motion. The motion carried with the following vote:

Board Chair – Heidi Franco: Approve

Director - Kevin Payne: Approve

Director – Brenda Christensen: Approve

Director - Sid Ostergaard: Not Present

Director – Aaron Cheatwood: Approve

Director -Kendall Crittenden: Approve

<u>Motion</u>. Director Christensen moved to accept the Consent agenda. Director Crittenden seconded the motion. The motion carried with the following vote:

Board Chair – Heidi Franco: Approve

Director - Kevin Payne: Approve

Director – Brenda Christensen: Approve

Director – Sid Ostergaard: Not Present

Director – Aaron Cheatwood: Approve

Director –Kendall Crittenden: Approve

- 2. Presentation and Discussion of Electric Financial Projection and Cost of Service Study. Mark Beauchamp had a meeting with the finance committee to discuss the financial projections for the years 2025 to 2029, using historical data to estimate revenues and expenses. He showed the steps involved in the rate study, focusing on the cost of service study, which analyzes the fees associated with serving different customer classes and their respective monthly charges. In the first two years, there will be a slight variation in Time of Use (TOU) rates, allowing customers to have more control over their energy consumption. During the meeting, Mark provided an overview of the assumptions made while reviewing the data, including a proposal to suspend the power cost adjustment until the second year's rate increase, which won't take effect until 2026. With Heber's rapid growth, the capital improvement plan outlines significant investments for 2025 and 2026, with some recovery expected from impact fees. Mark explained the financial modeling in detail, including the debt coverage ratio and projected cash balances, suggesting a 13% rate increase in 2025 to accommodate future employee costs and living adjustments. The discussion also covered the need to align service costs within 10% of the average for each customer class, with plans for different rate designs in the first and second years.
- 3. <u>Discussion and Possible Decision on the Sale of the Admin Building.</u> Heber Light & Power is waiting to hear back from Heber City on the purchase agreement Adam sent. The mayor mentioned that the city attorney will review the contract and provide feedback, making any necessary adjustments before finalizing the rent-back agreement. Kevin Payne believes we should get a new appraisal to confirm there hasn't been any increase since the last one in June.
- 4. <u>Approval of Date and Time for the Rate Adjustment Public Hearing.</u> Public Hearing for Rate Adjustment will be on February 26, 2025, at 6 p.m.

<u>Motion</u>. Director Christensen moved to accept the time and date for public hearing. Director Crittenden seconded the motion. The motion carried with the following vote:

Board Chair – Heidi Franco: Approve Director – Kevin Payne: Approve Director – Brenda Christensen: Approve Director – Sid Ostergaard: Not Present Director – Aaron Cheatwood: Approve Director – Kendall Crittenden: Approve

- 5. <u>Approval of Date Resolution 2025-01 Street Light Energy Charge Forgiveness.</u> See Consent Agenda
- 6. <u>Review of Cash Reserve and Dividend Calculation.</u> See Consent Agenda
- 7. <u>Approval of 2025 Board Meeting Schedule.</u> See Consent agenda
- 8. <u>Review and Approval of Fraud Assessment and Completion of Board Ethics Form.</u> See Consent Agenda

9. <u>Wholesale Power Report.3.</u> Emily reviewed the MWh budget and found that while we exceeded some areas, we were under budget in others. The biggest factor affecting the budget is the federal hydro. She analyzed the wholesale power costs per kilowatt-hour over the past decade, noting the fluctuations. This year, we've seen a 16% increase in costs.

10. <u>GM Report.</u>

<u>UAMPS Report.</u> UAMPS budget meeting has started for the year. Jason was elected the Chair of the project management committee on Hunter Power Project.

<u>System Improvement Award.</u> HLP was honored to receive an award from UAMPS for our work on the transmission line and the point of delivery substation.

<u>IPA Update.</u> Not a lot has shifted; they're just ramping up testing on some of the units. The hydrogen segment and ACES are still on track. We've managed to lower our callback for the IPP plant as we head into summer. We're aiming for 2 megawatts, but costs are soaring—jumping from \$64 to \$90. As they get closer to bringing the units online, expenses have spiked.

<u>Building Update</u>. Jason updated that the walls of the admin building were up. They talked about the HVAC setup and figured out where to place the units, which they managed to sort out. 2. There have been some changes to the costs involved as well.

Chair Franco called for a motion to adjourn the meeting.

<u>Motion</u>: Director Cheatwood moved to adjourn the meeting. Director Payne seconded the motion. The motion carried with the following vote:

Board Chair - Heidi Franco: Approve

Director - Kevin Payne: Approve

Director – Brenda Christensen: Approve

Director – Aaron Cheatwood: Approve

Director – Kendall Crittenden: Approve

Director – Sid Ostergaard: Not Present

Meeting adjourned.

Rylee Allen Board Secretary

Agenda Item 3: Discussion and Possible Approval of Amended Customer Rules

Board Meeting February 26,2025

AGREEMENT FOR SALE AND PURCHASE OF REAL PROPERTY

This Agreement for Sale and Purchase of Real Estate (the "Agreement") is entered into as of the <u>24</u>th day of <u>20000000</u>, 2025 (the "Effective Date"), by and between HEBER LIGHT & POWER COMPANY, a Utah interlocal entity ("Seller") and HEBER CITY COMMUNITY REINVESTMENT AGENCY, a political subdivision of the State of Utah, and its successors or assigns ("Buyer").

RECITALS

A. Seller owns approximately 0.41 acres of real property, County APN 00-0004-9119, located in Wasatch County, State of Utah, as more fully described on Exhibit A attached hereto (the "**Real Property**").

B. Buyer desires to purchase the Real Property, together with all together with (i) all easements, rights of way, benefits, privileges, rights, and appurtenances running with, related to, or pertaining thereto, (ii) all improvements of any kind located on, and all of Seller's right, title and interest in any land lying in any street, road or avenue in front of or adjoining, such Real Property, (iii) any and all entitlements, approvals, consents, goodwill, zoning rights, use rights, and other intangible assets and/or rights of any kind whatsoever related or appurtenant to such Real Property (collectively, the "**Property**").

TERMS AND CONDITIONS

In consideration of the amounts to be paid and the mutual promises contained herein, Buyer and Seller agree as follows:

ARTICLE I AGREEMENT TO PURCHASE AND SELL; PURCHASE PRICE

1.1 <u>Purchase and Sale</u>. In accordance with the terms and conditions set forth in this Agreement, and subject to the conditions precedent set forth in Section 1.4 below (or in any other provision of this Agreement), Seller agrees to convey to Buyer, and Buyer agrees to purchase and take from Seller, fee simple title in and to the Property.

1.2 <u>Purchase Price</u>. The purchase price for the Property (the "**Purchase Price**") is EIGHT HUNDRED SEVENTY SIX THOUSAND DOLLARS (\$876,000.00).

1.3 <u>Payment of Purchase Price</u>. Buyer shall pay the Purchase Price to Seller, as adjusted for prorations on the Closing Date, in cash, by cashier's check, or other immediately available funds.

1.4 <u>Conditions Precedent to Purchase</u>. The purchase of the Property by Buyer, and Buyer's obligations to close and consummate the purchase and sale transaction described herein, is expressly contingent on, conditioned on, and subject to the satisfaction, at Buyer's sole discretion, of all of the conditions listed below. In the event any one of the following items or issues has not been satisfied by the Closing Date (defined below), Buyer shall have the option (at Buyer's sole discretion) of terminating this Agreement or may defer Closing for up to sixty (60) additional days.

(a) Buyer's receipt before the Closing occurs of the Title Policy (defined below), or of the Title Company's irrevocable promise and commitment to issue the Title Policy in accordance with paragraph 2.1.

(b) Buyer and Seller have negotiated a lease agreement whereby Seller is allowed to continue to occupy the property after closing, in substantially the form attached hereto as **Exhibit C** (the "Lease Agreement").

(c) The full and complete satisfaction of all other terms, conditions and obligations of Seller under this Agreement.

ARTICLE II TITLE INSURANCE

2.1 Commitment of Title Insurance.

(a) <u>Commitment</u>. Buyer is in possession of, or will obtain, a commitment for extended owner's title insurance covering the Property (the "**Commitment**"), issued by the Title Company. The commitment shall be updated by the Title Company to a date on or after the date of this Agreement.

(b) Objections to Title. Buyer shall have fourteen (14) days following full execution of this Agreement and receipt of the updated Commitment to provide any written objections to any matter or issue set forth or disclosed in the Commitment, which objections may include matters and issues shown on any survey of the Property (collectively, the "Title/Survey Objections"). If Buyer does not timely deliver written notice of its Title/Survey Objections to Seller, Buyer shall be deemed to have approved of all matters set forth in the Commitment and on any survey. If Title/Survey Objections are timely made, Seller shall determine, at its sole discretion, as to each Title/Survey Objection, whether Seller is willing or able to eliminate (or obtain affirmative coverage in the Title Policy) over each of the Title/Survey Objections. At least five (5) business days prior to the end of the Due Diligence Period (defined below), Seller shall notify Buyer in writing as to those Title/Survey Objections that Seller will cause to be cured, eliminated, or insured over at Closing. Notwithstanding the foregoing, Seller shall be obligated to eliminate any deeds of trust, mortgages, judgment liens, mechanics' liens, materialmen's liens and other liens (the "Liens") recorded against the Property to the extent caused by, or arising as a result of, any actions or inactions by, on behalf of, or under the direction of, Seller. If (a) Seller's written notice indicates that Seller is unable or unwilling to eliminate or provide affirmative coverage over any Title/Survey Objections (other than the Liens), upon terms acceptable to Buyer at Buyer's sole discretion, or (b) Seller does not timely deliver the written notice as required hereunder, then in either event Buyer may (i) waive the Title/Survey Objections that Seller was unwilling or unable to cure and otherwise purchase the Property subject to

the other terms and conditions of this Agreement, or (ii) terminate this Agreement by either giving written notice to Seller at any time before the Closing occurs, whereupon neither Buyer nor Seller shall have any further right, liability, duty or obligation under this Agreement, except for agreements or covenants that specifically survive termination. Matters to which Buyer does not object shall be deemed to be "**Permitted Exceptions**" and shall not be considered objections to any matter contained in the Commitment.

(c) <u>Delivery of Title Insurance</u>. Except as otherwise stated in Section 2.1(b), Seller shall obtain and deliver to Buyer within ten (10) days after the Closing Date an ALTA Extended Owner's Policy of title insurance in the amount of the Purchase Price (in a form satisfactory to Buyer), which title policy shall (i) be effective as of the Closing Date, (ii) contain no exceptions other than the Permitted Exceptions, and (iii) include any and all endorsements requested by Buyer (collectively, the "**Title Policy**"). Buyer shall pay for the cost of the above stated Title Policy.

ARTICLE III REPRESENTATIONS AND WARRANTIES

3.1 <u>Representations and Warranties of Seller</u>. Seller makes the following representations and warranties to Buyer, as of the date of this Agreement and as of the Closing Date, each of which representations and warranties shall extend beyond and survive the Closing Date and delivery of the deed for the Property from Seller to Buyer:

(a) Seller has and on the Closing Date will have good and marketable fee simple title to the Property, free and clear of all encumbrances, liens, claims, or reservations, except as specifically approved by Buyer under this Agreement.

(b) Seller has the right, power and authority to execute, deliver, and perform this Agreement and the execution, delivery, and performance of this Agreement have been duly authorized by all necessary corporate (or other) actions on the part of Seller. Upon execution and delivery this Agreement, this Agreement shall constitute valid and binding obligations of Seller enforceable against Seller in accordance with its terms.

(c) Seller is unaware of and has not received notice any judgment, suit, claim, action, arbitration, legal, administrative, eminent domain action, or other proceeding or governmental investigation, pending or threatened, with respect to the Property and no activities or events have occurred on or in connection with the Property that could give rise to any such claims or proceedings.

(d) Seller has not received any notices, demands, or deficiency statements from any mortgagee of the Property or from any state, municipal, or county government or agency or any insurer relating to the Property and which have not been cured or remedied except property valuation and tax notices issued by the county which are not yet due and payable. (e) Except as otherwise expressly disclosed in the Commitment, the Property is not subject to any proposed special assessment or to any existing special assessment lien arising as a result of any works or improvements completed, installed, or contemplated at or before the Closing Date.

(f) No contracts, leases, licenses, commitments, or undertakings of which Seller is a party exist relating to the Property.

(g) Seller has paid and shall pay all liens, charges, taxes, and assessments for the Property arising prior to the Closing Date.

(h) No person, broker or entity, whether or not affiliated with either party is entitled to a commission, finder's fee, or other compensation arising from this Agreement, as regarding Seller.

(i) During the period from the Effective Date until the Closing Date, Seller shall maintain the Property and all improvements and personal property thereon (or related thereto) in a good and clean condition, and to the extent in Seller's control, shall preserve in all respects all value in the Property.

(j) Neither Seller nor any of its affiliates has made any assignment for the benefit of creditors, filed any petition in bankruptcy, been adjudicated insolvent or bankrupt, petitioned or applied to any tribunal for any receiver, conservator or trustee of it or any of its property or assets, or commenced any action or proceeding under any reorganization arrangement, readjustment of debt, conservation, dissolution or liquidation law or statute of any jurisdiction; no such action or proceeding has been commenced or threatened against Seller by any creditor, claimant, governmental authority or any other person or entity. Seller is not currently contemplating making any such assignment for the benefit of creditors, or filing any bankruptcy petition as more fully described above.

3.2 <u>Representations and Warranties of Buyer</u>. Buyer makes the following representations and warranties to Seller, as of the date of this Agreement and as of the Closing Date, each of which representations and warranties shall survive the Closing and delivery of the deed for the Property from Seller to Buyer.

(a) Buyer has the right, power and authority to execute, deliver, and perform this Agreement.

(b) No person, broker or entity, whether or not affiliated with Buyer, is entitled to a commission, finder's fee, or other compensation arising from this Agreement as regarding Buyer. Buyer shall indemnify, defend, and hold Seller harmless from and against any and all claims, loss, or damage relating to or arising out of any claim for compensation by any broker, person, or entity claiming by or through Buyer.

ARTICLE IV SELLER'S USE OF THE PROPERTY

From and after Seller's execution of this Agreement, Seller shall not, without the prior written consent of Buyer, grant or convey any easement, lease, license, permit, encumbrance, or any other legal or beneficial interest in or to the Property or engage in any negotiations with any party other than Buyer regarding the purchase or sale of the Property. Seller shall not enter into any service contract or other agreement related to the Property that would be binding on Buyer after the Closing. Except as otherwise provided for herein, Seller agrees to pay, as and when the same are due, all payments on any encumbrances presently affecting the Property and any and all taxes, assessments, and levies with respect to the Property through the Closing Date.

ARTICLE V MISCELLANEOUS

5.1 <u>No Due Diligence</u>. Buyer's purchase of the Property is **not** conditioned on due diligence by Buyer.

5.2 <u>No Financing Condition</u>. Closing is **not** conditioned on Buyer successfully obtaining financing

5.3 <u>Personal Property: Exclusions</u>. Any personal property remaining on the Property at the later of (i) Closing or (ii) the termination of the Lease Agreement shall be property of Buyer. The backup generator and transfer switch are excluded from the sale and may be removed by Seller at any time prior.

5.4 <u>As-Is Condition</u>. Buyer is purchasing the Property in as-is condition and Seller makes no warranties of any kind as to the condition of the Property or the suitability of the Property for any use contemplated by Buyer.

5.5 No Water. No water shares or water rights are included in this transaction.

5.6 <u>Property Information</u>. Seller hereby agrees to deliver or cause to be delivered at Seller's sole expense, within fourteen (14) days after the Effective Date, all of the following to Buyer (collectively, the "**Property Information**"), to the extent such Property Information is in Seller's possession or reasonable control, or in the possession or reasonable control of any of Seller's agents or contractors:

(a) All surveys of the Property;

(b) All environmental reports, studies, and site assessments relating to the Property;

(c) All traffic, engineering, soil, geotechnical, and hazardous substance reports, tests and inspection results and other similar tests, investigations or studies relating to the Property;

(d) All documents of any kind related to the construction, purchase, sale, and or transfer of the Property;

(g) All documents, agreements, contracts, written notices, memorandums of understanding, letters of intent, permits, or other information of any kind related to any and all utilities for the Property, and, if applicable, for each and every Lot within the Property (including the availability thereof);

(j) Any and all leases of any kind related to, encumbering, or affecting the Property (whether or not shown or disclosed on the Title Commitment); and

To Seller's knowledge, there are no false, untrue, or misleading statements or information in any of the Property Information. In addition, until Closing, to the extent Seller received any new or additional information related to any of the foregoing, Seller will promptly provide such information to Buyer.

ARTICLE VI CLOSING

6.1 <u>Time and Place of Closing</u>. The purchase and sale transaction contemplated by this Agreement shall be consummated through a closing conference (the "Closing"), which shall be held at the Title Company not more than thirty (30) days after Buyer has given notice to Seller that all of the conditions precedent set forth in Section 1.4 have been satisfied to Buyer's satisfaction in Buyer's sole discretion (the "Closing Date"), but in no event later than **April 30, 2025** or at such earlier time and place as the parties may mutually agree in writing.

6.2 <u>Actions at Closing</u>. At the Closing, the following events shall occur and each being declared to have occurred simultaneously with the other:

(a) All documents to be recorded and funds to be delivered hereunder shall be delivered to the Title Company in escrow, to hold, deliver, record and disburse in accordance with supplemental escrow instructions, the form and content of which shall be agreed to by the parties prior to Closing.

(b) At the Closing or sooner as otherwise stated in the escrow instructions, the following shall occur:

(i) Seller shall deliver or cause to be delivered in accordance with the escrow instructions:

(1) A Special Warranty Deed, in the form attached hereto as **Exhibit B**, conveying the Property to Buyer subject only to the Permitted Exceptions, which deed shall be duly executed and acknowledged by Seller and in proper form in all respects for recording in Wasatch County, Utah;

(2) All documentation, including without limitation an owner's affidavit, that the Title Company deems necessary or desirable in order to allow the Title Company to provide Buyer with the Title Policy;

(3) An affidavit fully executed and properly acknowledged by Seller, as required by Internal Revenue Code Section 1445(b)(2), in a form reasonably acceptable to the Title Company and to Buyer;

(4) All other documents required to be executed by Seller pursuant to the terms of this Agreement; and

(5) Any and all proration amounts as more fully set forth in this Agreement.

(ii) Buyer shall deliver or cause to be delivered in accordance with the escrow instructions:

- (1) The Purchase Price to be paid as provided in Section 1.3 hereof; and
- (2) All other documents required to be executed by Buyer pursuant to the terms of this Agreement.

(c) Buyer and Seller shall each deliver to the other, two executed copies of the Buyer's and Seller's settlement statement setting forth all prorations, credits provided in this Agreement, disbursements of the Purchase Price, and expenses of the Closing.

(d) Except as otherwise specifically set forth herein, Buyer and Seller shall share equally any Closing or escrow charges of the Title Company.

6.3 <u>Seller's Remedies</u>. In the event this transaction fails to close due to Buyer's fault or inability to close after the expiration of the Due Diligence Period, Seller, as Seller's sole and exclusive remedy, shall have the right to retain the Earnest Money Deposit, if any, as liquidated damages for Buyer's failure to close. The parties hereby agree that such amount is reasonable compensation to Seller for Buyer's failure to close, since the precise damage to Seller due to such failure of Buyer would be very difficult or impossible to determine.

6.4 <u>Buyer's Remedies</u>. In the event this transaction fails to close due to Seller's fault, Buyer shall be entitled to have the Earnest Money Deposit, if any, returned and shall be entitled to any and all other remedies available at law or in equity, including (without limitation) specific performance.

ARTICLE VII PRORATIONS

7.1 <u>Prorations Between Seller and Buyer</u>. The following prorations shall be made between Seller and Buyer as of the Closing Date:

(a) Closing costs shall be apportioned between the parties in accordance with the normal and customary practice of commercial real estate transactions in Wasatch County, Utah.

ARTICLE VIII RELEASE, ASSUMPTION, AND INDEMNITY

Seller shall release, indemnify, save, hold harmless, and defend Buyer against any and all claims, suits, losses, liabilities, costs, expenses, or damages made against or incurred by Buyer relating to the condition (environmental or otherwise) of the Property prior to the Closing Date or any activity in connection with the Property that occurred prior to the Closing Date.

ARTICLE IX LOSS OF THE PROPERTY PRIOR TO CLOSING

9.1 <u>Risk of Loss</u>. The risk of loss with respect to the Property shall be borne by Seller until the Closing occurs.

Condemnation. If any portion of the Property becomes the subject of a condemnation 9.2 proceeding(s), Seller shall promptly notify Buyer in writing of such proceedings, and Buyer shall have the option to (i) terminate this Agreement with written notice to Seller, or (ii) elect not to terminate this Agreement, in which event this Agreement shall remain in full force and effect. If Buyer does not make any election within fifteen (15) days after receipt of Seller's written notification of such condemnation proceedings(s), then Buyer shall be deemed to have elected to not terminate this Agreement. If Buyer does not terminate the Agreement (or is deemed not to have terminated this Agreement), then at Closing (a) Seller shall pay to Buyer all condemnation awards or proceeds from any such proceedings or actions in lieu thereof received by Seller to the date of Closing, (b) Seller shall assign to Buyer all of Seller's rights to defend such proceedings or actions in lieu thereof, and all of Seller's rights to receive any additional condemnation awards or proceeds, and (c) Buyer shall take the Property subject to any such condemnation proceeding(s). As used herein, the phrase "becomes the subject of a condemnation proceeding(s)" shall mean any notice or knowledge by Seller of any formal or informal condemnation by any governmental authority against any portion of the Property.

9.3 <u>Casualty</u>. If the Property shall be damaged by any casualty of any kind prior to Closing, Seller shall promptly notify Buyer in writing of such damage, and Buyer shall have the option to (i) terminate this Agreement with written notice to Seller, in which event the Earnest Money Deposit, if any, shall be immediately returned to Buyer, or (ii) elect not to terminate this Agreement, in which event this Agreement shall remain in full force and effect. If Buyer does not make any election within fifteen (15) days after receipt of Seller's written notification of such damage, then Buyer shall be deemed to have elected to not terminate this Agreement. If Buyer does not terminate the Agreement (or is deemed not to have terminated this Agreement), then at Closing (a) Seller shall pay to Buyer all insurance awards or proceeds from any such damage or received by Seller to the date of Closing, (b) Seller shall assign to Buyer all of Seller's rights to any additional awards or proceeds, and (c) Buyer shall take the Property subject to any such damage.

ARTICLE X

(reserved)

ARTICLE XI GENERAL PROVISIONS

11.1 <u>Entire Agreement</u>. This Agreement contains the entire agreement between the parties respecting the matters herein set forth and supersedes all prior agreements, which written or oral, between the parties respecting such matters. Any amendments or modifications hereto in order to be effective shall be in writing and executed by the parties hereto.

11.2 <u>Amendments</u>. This Agreement may be amended or modified only by mutual written agreement of the parties hereto.

11.3 <u>Survival</u>. All warranties, representations, covenants, and agreements contained in this Agreement (including without limitation the release and indemnity described in Article VIII above) shall survive the execution and delivery of this Agreement and all documents delivered in connection with this Agreement and shall survive the Closing of the transactions contemplated by this Agreement and all performances in accordance with this Agreement.

11.4 <u>Successors and Assigns</u>. This Agreement shall be binding upon and inure to the benefit of the parties hereto and their respective successors, heirs, administrators, and assigns; provided, however, that notwithstanding the foregoing, Seller's interest under this Agreement may be assigned, encumbered, or otherwise transferred, whether voluntarily, involuntarily, by operation of law or otherwise. Buyer may assign this Agreement to Heber City or another governmental entity associated with Heber City, but not otherwise.

11.5 <u>Notices</u>. Any notice, demand, or document which any party is required or any party desires to give or deliver to or make upon any other party shall be in writing, and may be personally delivered or given or made by recognized overnight courier service or by United States registered or certified mail, return receipt requested, with postage prepaid, addressed as follows:

| To Seller: | Heber Light & Power Company |
|------------|-----------------------------|
| | 31 South 100 West |
| | Heber City, UT 84032 |
| | Attn: Bart Miller |

To Buyer: Heber City 75 N. Main Street Heber City, UT 84032 Attn: Matt Brower Any party may designate a different address for itself by notice similarly given. Unless provided herein, any such notice, demand or document so given shall be effective upon delivery of the same to the proper address of the party or parties to whom the same is to be given.

11.6 <u>Time of Essence</u>. Time is of the essence in the performance of each and every term, condition, and covenant of this Agreement.

11.7 <u>Counterparts</u>. This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.

11.8 <u>Headings</u>. Any and all headings herein contained are for purposes of identification only and shall not be considered in construing this Agreement.

11.9 <u>Attorneys' Fees</u>. The prevailing party in any legal proceeding brought to enforce rights hereunder shall recover from the other party its reasonable attorney fees and costs. As used herein in the term "prevailing party" means the party entitled to recover the costs in any suit, whether or not brought to judgment, and whether or not incurred before or after the filing of suit.

11.10 <u>Waiver</u>. Except as herein expressly provided, no waiver by a party of any breach of this Agreement or any warranty or representation under this Agreement by another party shall be deemed to be a waiver of any other breach of any kind or nature (whether preceding or succeeding and whether or not of the same or similar nature) and no acceptance of payment or performance by a party after any such breach by another party shall be deemed to be a waiver of any further breach of this Agreement or of any representation or warranty by such other party whether or not the first party knows of such a breach at the time it accepts such payment or performance. No failure on the part of a party to exercise any right it may have by the terms of this Agreement or by law upon the default of another party, and no delay in the exercise of any such right by the first party at any time when such other party may be in default, shall operate as a waiver of any default, or as a modification in any respect of the provision of this Agreement.

11.11 <u>Exhibits</u>. Any and all exhibits attached or to be attached hereto are hereby incorporated and made a part of this Agreement by reference.

11.12 <u>Governing Law</u>. This Agreement shall be governed and construed in accordance with the laws of the State of Utah.

11.13 No Recording. This Agreement shall not be recorded in the real property records.

11.14 <u>Further Instruments</u>. Each party hereto shall from time to time execute and deliver such further documents or instruments as the other party, its counsel, or the Title Company may reasonably request to effectuate the intent of this Agreement, including without limitation documents necessary for compliance with the laws, ordinances, rules, and regulations of any applicable governmental authorities.

11.15 <u>Confidentiality</u>. The Purchase Price and terms of this Agreement are intended by both parties to be confidential during the operative period of this Agreement. Therefore, except as

directed by a court, administrative authority or required by subpoena or by law, neither party shall disclose the Purchase Price or terms of this Agreement or any other non-public information related hereto; provided, however, Buyer may disclose any and all information related to this Agreement or the Property to any and all consultants, attorneys, employees, contractors, agents, representatives, lenders, and others to the extent necessary to evaluate, inspect, or review the Property and the purchase and sale transaction as described herein.

IN WITNESS WHEREOF, the parties hereto have executed this Agreement effective as of the date and year first above written.

EXHIBIT C

FORM OF LEASE AGREEMENT

LEASE AGREEMENT

This Lease Agreement ("Agreement") is made and entered into this 2th day of <u>Feb</u>, 2025, by and between **HEBER CITY COMMUNITY REINVESTMENT AGENCY**, a political subdivision of the State of Utah ("Lessor"), and **HEBER LIGHT & POWER COMPANY**, a Utah interlocal entity ("Lessee").

RECITALS

A. Lessor is the owner of certain real property located at approximately 31 South 100 West, Heber City, Wasatch County, Utah ("**Property**"). The Property is more fully described on **Attachment A**.

B. Subject to and upon the terms and conditions set forth in this Lease, Lessor desires to lease to Lessee, and Lessee desires to lease from Lessor, the Property and other rights and appurtenances described herein for the use of an administrative facility.

NOW, THEREFORE, for and in consideration of the mutual covenants and benefits herein contained and other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto hereby agree as follows:

AGREEMENT

1. <u>Premises</u>. Lessor hereby leases to Lessee the Property; subject to the terms set forth herein, for purposes substantially similar to the purposes for which Lessee has historically used the Property. Lessee agrees to take the Property on an "as-is" basis and acknowledges that Lessee has had opportunity to fully inspect the Property prior to entering into this Agreement.

2. Lease Term. The initial term of this Agreement commences on the _____ day of _____2025 ("Commencement Date") and continues for six (6) months following the Commencement Date ("Initial Term"). This Agreement shall automatically renew for two (2) additional successive six (6) month terms (each, a "Renewal Term") unless terminated by Lessee by giving written notice to the Lessor at least one hundred twenty (120) days before the expiration of the Initial Term or any successive Renewal Term. The Initial Term and any Renewal Terms shall be collectively referred to herein as the "Term".

3. Termination. In the event Lessee moves its operations off of the Property, this Agreement will automatically terminate upon thirty (30) days following written notice from Lessor of its intent to terminate this Agreement. Lessee hereby agrees to provide such notice within a reasonable time after ceasing Lessee's use of the Property.

4. <u>Rent</u>. Commencing on the Commencement Date, Lessee shall pre-pay to Lessor annual rent for the Initial Term in the amount of one dollar (\$1.00). The rent for any Renewal Terms shall be one dollar (\$1.00) per each Renewal Term. Rent shall not be prorated for any partial Renewal Term.

5. <u>Nature of Lessee's Use</u>. Lessee shall use the Property in substantially the same manner as Lessee has historically used the Property.

6. Indemnity and Hold Harmless; Waiver of Consequential Damages. Each party ("Indemnifying Party") hereby indemnifies and holds the other party ("Indemnified Party") harmless against any claim of liability or loss from personal injury or property damages to the extent the same is caused by or resulting from Indemnifying Party's negligence, willful misconduct, breach of this Agreement or other tortious conduct or that of its employees, contractors, servants, or agents. However, the Indemnifying Party does not indemnify or hold the Indemnified Party harmless for the proportionate amount of such claims resulting from the negligence or willful misconduct of the Indemnified Party shall not be liable to the Indemnifying Party, or any of the Indemnifying Party's employees, contractors, servants, or agents, for any lost revenue, lost profits, loss of technology, rights or services, incidental, punitive, indirect, special or consequential damages, or interruption or loss of use of service, even if advised of the possibility of such damages, whether under theory of contract, tort (including negligence), strict liability, or otherwise.

7. <u>Maintenance</u>. Property. During the Term, Lessee shall maintain and repair the Property as permitted herein in compliance with all applicable laws and otherwise in good condition, subject to normal wear and tear.

8. <u>Utilities</u>. Lessee is responsible for the direct payment of all utilities required by its use of the Property.

9. <u>Authority and Quiet Enjoyment</u>. Lessor represents that, as of the execution date of this Agreement, it has the full right, power, and authority to execute this Agreement and, upon written request prior to execution of this Agreement, will provide Lessee with evidence of that authority. Lessor further covenants that, on paying the rent and performing the covenants herein, Lessee shall have quiet enjoyment of the Property during the Term.

10. <u>Applicable Laws</u>. Lessee shall, in respect to the condition of the Property and at Lessee's sole cost and expense, comply with all laws relating to Lessee's nature of use of the Property (as permitted herein).
11. <u>Binding Nature of Agreement; Assignment</u>. This Agreement shall be binding on and inure to the benefit of the parties, their respective successors, and assigns. This Agreement shall not be sold, assigned, or transferred by Lessee without Lessor's prior written approval.

12. <u>Complete Agreement - Integration</u>. It is mutually agreed and understood that this Agreement contains all agreements, promises, and understandings between Lessor and Lessee relating to the subject matter hereof and that no other agreements, promises, or understandings shall or will be binding on either Lessor or Lessee in any dispute, controversy, or proceeding at law relating to the subject matters hereof. Any amendment to this Agreement is void and ineffective unless it is signed in writing by both parties.

13. <u>Utah Law Applicable</u>. This Agreement and its performance shall be governed, interpreted, construed, and regulated by the laws of Utah.

14. <u>Delivery of Notices</u>. All notices and other communications required or permitted under this Agreement shall be in writing and shall be given by any of the following methods: United State Mail, first class, postage, prepaid, registered or certified U.S. Mail, postage prepaid and return receipt requested; or by hand delivery (with the signature of a person receiving the notice on behalf of Lessor). A notice or communication sent by a different method becomes effective only if the person to whom the document is addressed actually receives it.

Lessor's address: Heber City 75 N. Main Street Heber City, UT 84032 Attn: Matt Brower

Lessee's address: Heber Light & Power Company 31 South 100 West Heber, UT 84032 Attn: Bart Miller

15. <u>No Waiver</u>. Any party's failure to enforce any provision of the Agreement shall not constitute a waiver of the right to enforce such provision. The provisions may be waived only in writing signed by the party intended to be benefited by the provisions and a waiver by a party of a breach hereunder by the other party shall not be construed as a waiver of any succeeding breach of the same or other provisions.

16. <u>Severability</u>. If any portion of any term or provision of this Agreement, or the application thereof to any person or circumstance, shall be invalid or unenforceable, at any time or to any extent, the remainder of this Agreement, or the application of such term or provision to persons or circumstances other than those as to which it is held invalid or unenforceable, shall not be affected thereby, and each term and provision of this Agreement shall be valid and be enforceable to the fullest extent permitted by law.

17. **Drafting Party**. This document has been and shall be deemed to be a product of joint drafting by the parties and there shall be no presumption otherwise.

18. <u>Captions</u>. The captions and headings in this Agreement are for convenience only and shall not be considered in construing any provision contained in this Agreement.

19. <u>Attorney Fees</u>. In any action arising out of this Agreement, the prevailing party shall be entitled to costs and reasonable attorney fees.

20. <u>Counterparts</u>. This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, but all of which shall constitute one and the same instrument.

21. **Further Assurance**. Each party shall do such acts and things as the requesting party may reasonably require for the purpose of giving the full benefit of this Agreement to the requesting Party.

[remainder of page intentionally left blank; signature page follows]

IN WITNESS WHEREOF, the Parties hereto have executed this Agreement as of the day and year first above written.

Agenda Item 3: Discussion and Possible Approval of Amended Customer Rules

Board Meeting February 26,2025

HEBER LIGHT & POWER COMPANY BOARD RESOLUTION NO. 2025-01

RESOLUTION APPROVING AMENDMENTS TO HEBER LIGHT & POWER COMPANY ELECTRIC SERVICE RULES

WHEREAS the Heber Light & Power Company ("Company") is an energy services interlocal entity created by Heber City, Midway City, and Charleston Town ("Members") to provide electric service to customers within the municipalities and surrounding areas.

WHEREAS the Company has established Electric Service Rules that govern the provision of electric service to the Company's customers.

WHEREAS the Electric Service Rules are updated periodically to adapt to changing circumstances and Company and customer needs.

WHEREAS the Company's management has prepared and submitted to the Board for approval changes to the Electric Service Rules updating Rule 3 – Types of Electric Service, Rule 11 – Service Connections, and Rule 15 – Line Extensions.

WHEREAS the Board has carefully considered the suggested amendments to the Electric Service Rules.

NOW THEREFORE, BE IT RESOLVED BY BOARD OF DIRECTORS OF HEBER LIGHT & POWER COMPANY AS FOLLOWS:

1. The Board finds that the amendments to the Electric Service Rules are in the best interests of the Company and its customers. The Board specifically finds that the applicant build provisions of the revised Rule 15 are appropriate and necessary, provided; however, that these provisions are implemented and enforced by the Company in a manner that protects the Company's electrical system and customers.

2. The Board hereby approves and adopts, effective immediately, the amendments to the Company's Electric Service Rules as set forth in Exhibits A, B, and C to this resolution.

3. The Board hereby reaffirms its prior approval and adoption of the unchanged portions of the current Electric Service Rules.

4. The Board authorizes the Company's Management, before publishing the updated Electric Service Rules, to make non-substantive editorial changes to language or formatting to clarify the amended language or correct typographical errors.

APPROVED AND ADOPTED the 26th day of February 2025.

HEBER LIGHT & POWER COMPANY

Heidi Franco, Board Chair

Attest:

Rylee Allen, Board Secretary

EXHIBIT A

Rule 3 – Types of Electric Service

Service Rule 3: TYPES OF ELECTRIC SERVICE

The Company offers the following types of Electric Service to qualified Customers:

A. <u>Residential Service</u>. Residential Service is Service provided to a Customer solely for domestic purposes in a single or multiple family dwelling. Service to dwellings where a person typically stays for less than 30 days, such as short-term residential rentals, hotels, motels, camps, lodges and clubs, is not Residential Service. No demand charge is applicable to Residential Service (except for Residential Pumping).

B. <u>General Service</u>. Electric Service not meeting the definition of Residential Service is General Service further classified as Small General Service, Medium General Service and Large General Service in the Company's Fee Schedule. A demand charge, as shown on the Fee Schedule, is charged to all General Service Customers.

- 1. Classification of General Service Customers shall be as follows:
 - Small Commercial general service customers with less than or equal to 30 kw of demand.
 - Medium Commercial general service customers with more than 30 kw of demand and less than or equal to 250 kw of demand.
 - Large Commercial general service customers with more than 250 kw of demand.

2. General Service Customers are classified based on peak demand (15minute interval) during a given billing cycle. If peak demand exceeds the threshold for the current classification during a given billing cycle, that Customer will be moved up to the classification corresponding to that peak demand and will remain in that classification for a minimum of twelve billing cycles. If monthly peak demand for a General Service Customer is below the minimum threshold for the current classification for eleven consecutive billing cycles, that Customer will be moved to the corresponding lower classification for the next billing cycle.

C. <u>Renewable Generation</u>. Customers may apply (1) for Net Metering Service as provided in Rule 14 or (2) to participate in the Company's Solar Power Sales Pilot Program.

D. <u>Distribution Voltage</u>. A General Service Customer may receive Service at distribution voltage through a primary meter under a Special Service Contract.

E. <u>Temporary Service</u>.

1. Temporary Service is Service provided to a Customer for a limited period

of time, usually not more than 12 months.

1.2. Temporary Service is not provided for single family residential units with a Service size of less than 600 amps. Exceptions to this rule may be granted at the Company's discretion based on extenuating circumstances and any such request shall be supported with a detailed technical and/or functional justification as to why Temporary Service is needed in the particular situation.

2.3. To receive Temporary Service, the Customer must: (a) apply and qualify for Service under Rule 4; (b) pay for any construction or modification of the Company's facilities to meet the necessary voltage or capacity requirements for providing the Temporary Service; and (c) pay the Temporary Meter Connection Fee.

3.4. The Company shall bill the Customer for electric usage during the period of Temporary Service at the applicable rate.

4.5. If the Temporary Service is for construction of new or expanded Service, the Customer shall pay any applicable Impact Fee. In addition, requests for Temporary Service for a period longer than 12 months may be considered Permanent Service, subject to an Impact Fee and the Company's safety and construction standards for Permanent Service.

F. <u>Service to Non-Owner-Occupied Property</u>. The Owner and/or Non-Owner Occupant may apply for Electric Service for Non-Owner-Occupied Property by complying with Rule 4. The Service shall be classified as Residential or General Service as provided in this Rule 3 A and B. Multiple unit property must comply with the Meter requirements of Rule 13. As provided in Rule 4. G, an Owner may agree to be responsible for Electric Service during times when the property is not occupied by a Customer.

G. <u>Special Service Contract</u>. Customers requesting General Service may be required to enter a Special Service Contract to address unique circumstances not fully or adequately covered by these Rules. Requests for Special Service Contracts shall be considered on a case-by-case basis.

EXHIBIT B

Rule 11 – Service Connections

Service Rule 11: SERVICE CONNECTIONS

A. <u>Overview</u>

1. <u>Applicability</u>. This rule governs the installation, ownership, repair and replacement of a Service Connection to the Company's system. A Service Connection is, in general terms, the line and equipment required to connect the Customer's facilities at the Service Address to the Company's transformer serving the Service Address. Buildings or other locations that have received Electric Service in the past may have existing Service Connections that could be used for new Electric Service of the same type as previously provided. If the location does not have an existing Service Connection or if the existing Service Connection does not comply with applicable electric codes, the Customer must provide a Service Connection as provided in this Rule 11.

2. <u>Types and Elements of Service Connections</u>. As shown in the Company's Design & Construction Specifications ("Specifications"), there are different types of Service Connections depending on a variety of factors including whether the line is above or below ground. However, generally speaking, the Service Connection consists of: (a) a Meter Base, (b) a Service Line, (c) Conduit, and (d) the Meter. The installation, ownership, and maintenance of these components are addressed in this Rule 11. The Specifications are available at the Company's Business Office and on the Company's Website. In the event of a conflict between this Rule 11 and the Specifications, the Specifications shall control.

3. <u>Line Extensions</u>. In some areas, the Company's distribution lines may not extend to the Customer's Service Address or the Company's distribution lines or other equipment may not have sufficient capacity to serve the Customer's load. In such cases, Rule 15 requires that the Customer pay the cost of extending the Company's lines and equipment to provide sufficient capacity to serve the Customer's load. If the requested Service requires a Line Extension, the Customer would pay the cost of both the Line Extension and the Service Connection.

4. <u>Transfer Switch</u>. The Company allows the installation of a transfer switch as an accommodation to Residential Customers but only if the Customer strictly complies with the operating procedure for attachments to the Meter socket on the Meter Base and timely pays all of the Company's costs. The Company's operating procedure for approval of Transfer Switches is found on the Company Website.

B. <u>Pre-Installation Requirements</u>. Before beginning installation of a Service Connection, the Customer shall apply for Service and complete the requirements of Rule 4.

- C. <u>General Requirements for Service Connections</u>
 - 1. <u>Compliance with Service Connection Requirements</u>. The Customer

shall design and install the Service Connection in accordance with (a) the Company's Specifications and Electric Service Rules, (b) applicable city, county or state requirements and (c) the National Electrical Code and National Electrical Safety Code. These standards, rules, codes and laws are collectively referred to as "Service Connection Requirements."

2. <u>Governmental Permits and Approvals</u>. The Customer must also obtain any necessary city and/or county permits or approvals and pay all applicable fees.

3. <u>Company's Assistance</u>. A Customer should consult with the Company's Distribution Manager if the Customer has any doubt or question on the application of the Service Connection Requirements. If the Customer does not comply with the Service Connection Requirements, the Company will not install a Meter or provide Service to Customer until the defects are corrected.

4. <u>Customer's Responsibility for Installation</u>. The Company's approval of the Customer's plans or the Company's inspection and approval of the installation is not a representation or warranty that the plans or installation are adequate or safe. The Customer is solely responsible for the plans and installation and agrees to indemnify and hold the Company harmless from any damage caused by a defect in the Customer's plans, installation, or facilities.

5. <u>Safety During Installation and Maintenance</u>. The Customer shall comply with all applicable safety regulations, codes or laws including OSHA in the installation and maintenance of the Service Connection. The Customer shall notify the Company of the Customer's intent to work or engage in activity near the Company's facilities and shall follow the Company's rules concerning such activities. In no event shall the Customer work or engage in activities within 10 feet of any overhead power line nor shall the Customer excavate without contacting Blue Stakes (811) for the location of all underground utilities.

6. <u>Joint Use of Trenches</u>. Joint use by other utilities of trenches used by the Company is not allowed except for compatible telecommunication lines installed pursuant to a joint use agreement.

7. <u>Company Facilities</u>. The Customer is prohibited from accessing, touching, tampering with, or modifying any Company property or facilities including, without limitation, the Company's transformer to which the Customer's Service Connection is attached.

D. <u>Meter Base</u>.

1. <u>Specifications</u>. A Meter Base is the structure on which the Meter is installed and which is connected to the Company's transformer by the Service Line. The Customer shall design and install the Meter Base in compliance with the Service Connection Requirements.

2. <u>Design/Installation</u>. The Customer shall, at the Customer's own expense, design, construct and install the Meter Base in compliance with the Service Connection Requirements and shall connect the Meter Base to the Service Line. A licensed electrician shall install the Meter Base and connect the Service Line to the Meter Base.

3. <u>Ownership/Maintenance</u>. The Customer shall own and be solely responsible for the repair, replacement and maintenance of the Meter Base. If, at any time, the Meter Base does not comply with the Service Connection Requirements, the Company may immediately discontinue Service until the Customer, at the Customer's own expense, corrects the defects.

E. <u>Service Line</u>.

1. <u>Specifications</u>. The Service Line is the line connecting the Meter Base and the Company's transformer. The Customer shall design and install the Service Line in compliance with the Service Connection Requirements.

2. <u>Installation</u>. The Customer shall, at the Customer's own expense, obtain and install the Service Line and connect the Service Line to the Meter Base. The installation of the Service Line shall comply with the Service Connection Requirements. A licensed electrician shall install the Meter Base and connect the Service Line to the Meter Base.

3. <u>Inspection</u>. When the Company installs the Meter, it shall inspect the Service Line, the Meter Base, and the connection between the Meter Base and Service Line. If the Customer's installation does not comply with the Service Connection Requirements, the Company shall not install the Meter or commence Service until the Customer, at the Customer's own expense, corrects the defects.

4. <u>Connection to Company's Transformer</u>. The Company connects the Service Line to the Company's transformer at the time the Meter is installed.

<u>5.</u> <u>Ownership and Maintenance of Service Line</u>. At the time the Meter is installed, the Company becomes the owner of and responsible for the repair, replacement and maintenance of the Service Line and its connection to the Meter Base and transformer.

a. <u>The foregoing notwithstanding, the Customer shall be</u> responsible for repair or replacement of the Service Connection (including the Service Line) if the damage is caused by (i) acts or omissions of the Customer, (ii) acts or omissions of a contractor engaged by the Customer, (iii) natural disasters or acts of God, (iv) or, for overhead Service Lines, damage from falling trees, tree limbs, or other objects.

F. <u>Conduit</u>.

1. <u>Specifications</u>. Conduit is the pipe in which, some or all, of the Service Line is placed depending on the type of Service Connection. It may be placed underground, attached to the Company's pole or attached to the Customer's building. Customer shall design and install the Conduit in compliance with the Service Connection Requirements.

2. <u>Installation</u>. The Customer shall, at the Customer's own expense, obtain and install the conduit required for the Service Connection in compliance with the Service Connection Requirements.

3. <u>Inspection</u>.

a. <u>Underground Conduit</u>. Before underground Conduit is covered, the Customer shall notify the Company and permit the Company to inspect the installation to assure that the Conduit and installation is in compliance with the Service Connection Requirements. If the Conduit is covered before inspection, the Customer, at its expense, shall remove the cover to permit inspection.

b. <u>Above-ground Conduit</u>. The Company shall inspect the installation of above-ground Conduit when the Service Line is connected to the Company's transformer and when the Meter is installed.

If the installation of the Conduit does not comply with the Service Connection Requirements, the Company shall not install the Meter nor shall it provide Service until the Customer, at the Customer's own expense, corrects the defects.

4. <u>Ownership and Maintenance of Conduit</u>. At the time the Meter is installed, the Company shall become owner of the Conduit and responsible for the Conduit's repair, replacement and maintenance. <u>The foregoing notwithstanding, the Customer shall be responsible for repair or replacement of the Service Line (including Conduit and conductor) if the damage is caused by acts or omissions of the Customer or a contractor engaged by the Customer.</u>

G. <u>Meter</u>

1. <u>Installation</u>. When the Customer completes installation of the Meter Base, Conduit and Service Line, the Customer may request that the Company install the Meter and begin providing Electric Service.

2. <u>Ownership/Maintenance</u>. The Company shall own and maintain the Meter. The Customer is prohibited from attempting to repair or tamper with the Company's Meter or to break the Company's seal on the Meter. If the Customer tampers

with the Meter or the Meter's seal, the Company shall immediately terminate Electric Service as provide in Rule 8 and the Customer shall pay the Company all costs for the repair or replacement of the damaged Meter or seal.

3. <u>Meters for Multiple Units</u>. The Customer shall permanently and correctly label each Meter Base in a multiple–unit building or mobile home park; the Company is not responsible for misidentified Meters. Before installing Meters, the Company shall check such Meter Bases to verify they are correctly labeled and require the developer or owner to correct any mislabeled Meter Bases. The Company will charge a Service Fee for verifying labeling of Meter Bases and dealing with labeling issues. The Company provides Electric Service to the Meter associated with the particular Customer's account. The Company has no responsibility for any electrical facilities on the Customer side of a Meter.

4. <u>Meter Fee</u>. In the Customer's first Bill for Electric Service, the Company shall charge a Meter Fee for the Company's providing and installing the Meter. If the Customer does not timely pay the Meter Fee, the Customer's Service is subject to termination under Rule 8.

H. <u>Scheduling Company Inspections or Meter Installations</u>. The Customer may schedule inspections and/or Meter installations by contacting the Company's business office at 31 South 100 West Heber City, Utah. If the Meter Base, Service Connection or any other Customer installation are not properly completed or are covered at the time scheduled for an inspection or Meter installation, the Company shall not conduct the inspection or install the Meter and the Customer shall pay a Service Fee before a return inspection or Meter installation is scheduled.

EXHIBIT C

Rule 15 – Line Extensions

Service Rule No. 15: LINE EXTENSIONS

A. <u>Definition</u>. A line extension ("Line Extension") is a continuation of, or branch from, the nearest available existing distribution line, and/or the installation of additional capacity in lines or facilities to meet the Customer's requirements at the Service Address. A Line Extension may be single-phase, three-phase, a conversion of single-phase line to a three-phase line or the provision of additional capacity in existing lines or facilities.

B. <u>Procedure</u>.

1. A Customer requesting a Line Extension must submit a Line Extension Application.

2. The Customer shall meet with Company personnel, pay a Job Initiation Fee, and submit a copy of the plans in electronic format compatible with the Company's software.

3. The Company shall provide the Customer with an infrastructure design for the requested Line Extension. The Customer shall pay for the Company's actual costs (based on standard Company labor rates) if changes to the Customer's plans require a new design and cost estimate. The Company will prepare infrastructure designs in the order the requests were received.

4. Upon completion of the design for the requested Line Extension, the Company will provide the design to the Customer along with a preliminary cost estimate for the Line Extension. TheUnless the Customer notifies the Company that the Customer will be self-installing the Line Extension, the Company will invoice the Customer for all necessary materials at then-current costs. The Line Extension process will proceed in accordance with Paragraph 5 for Company-installed Line Extensions and Paragraph 6 for Customer-installed Line Extensions.

5. Company-installed Line Extensions:

- a. Prior to the construction of the Line Extension, the Customer shall be required to sign the Company's standard Agreement for Construction of Infrastructure and pay a deposit for the estimated cost of all materials for the requested Line Extension. The form of the Agreement for Construction of Infrastructure is available upon request.
- b. Upon receipt of the materials deposit, the Company will order the materials for the Line Extension.
- c. Once the ordered materials have been received and Customer-provided conduit has been installed and inspected, the Company will issue to the Customer a final invoice for the requested Line Extension. This final invoice will include (a) the actual cost of materials (which may be more or less than the initial materials estimate), (b) the actual costs of all necessary trench and conduit inspections (at standard Company labor rates), and (c)

labor and other costs for the construction of the Line Extension. This final invoice represents the full cost to the Customer for the Line Extension.

- d. Upon payment of the final invoice, the Line Extension project will be placed in the Company's work queue. The date of payment of the final invoice determines the place in the queue for a particular project.
- 6. Customer-installed Line Extensions:
 - a. A Customer may elect to self-install a Line Extension instead of the Company performing the work (also referred to as an "applicant built line extension"). Such work shall be performed in accordance with Company standards and pursuant to the Company's design and specifications.
 - b. The Customer must sign the Company's Applicant Built Line Extension Agreement and the Applicant Built Line Expectations and Requirements document.
 - c. The installation of a Customer-installed Line Extension must be performed by a qualified, licensed contractor that is acceptable to the Company. The Company may maintain a list of acceptable contractors.
 - d. The Company maintains a listing of acceptable materials and equipment for Customer-installed Line Extensions. All materials and equipment used in a Customer-installed Line Extension shall be from the then-current approved materials list, unless approved in advance by the Company.
 - e. The Customer shall pay for all necessary inspections and other work by the Company (such as tagging, mapping, etc.) at the then-current Company labor rates and/or in accordance with the then-current fee schedule. All such costs shall be paid by the Customer prior to connection of the Line Extension to the Company's system.

C. <u>Additional Capacity</u>. Should the Company elect to install additional capacity or infrastructure greater than that required to meet the Customer's service requirements, the Customer shall only be required to pay for the cost of the minimum, standard facilities required to serve Customer's load and load characteristics in compliance with the Company's service standards.

D. <u>Construction and Design</u>. The design, location, materials, and methods of construction of the Line Extension shall be in compliance with the Company's Specifications, the National Electric Code, the National Electrical Safety Code, and applicable law.

E. <u>Ownership</u>. Line Extensions constructed by the Company or Customer or any infrastructure described in an Agreement for Construction of Infrastructure, including any make-ready work, shall, upon completion and Company acceptance, be owned, operated and maintained by the Company.

F. <u>Easements</u>. The Customer shall convey to the Company any easements required by the Company across the property on which the Line Extension is to be constructed whether or not the property is owned by the Customer or by a third party. <u>Easements shall be in a form reasonably acceptable to the Company</u>. The Customer shall also obtain any necessary permits, governmental approvals or zoning changes and pay all costs associated with obtaining the easements, governmental approvals, permits or zoning changes. The Company's easements shall be evidenced by the recorded plat or other recorded document.

G. <u>Refunds</u>.

1. A Customer who enters into an Agreement for Construction of Infrastructure and who pays for a Line Extension is the Initial Customer under this Rule 15 H. and may be eligible for a refund of a portion of the cost of the Line Extension during the first three years ("Refund Period") following completion of construction if additional Customers ("Additional Customers") connect to the Line Extension. The Agreement for Construction of Infrastructure shall include a schedule for refunds by Additional Customers who connect to the Line Extension within the Refund Period.

2. The Company does not offer refunds if the total cost of the Line Extension is less than \$5,000.00 or the new Customer's share of the cost is less than \$300.

3. The Refund Period shall be measured from the date of completion of the Line Extension as shown in the Company records and as noticed to the Customer.

4. The refund schedule shall be based on the total cost of the Line Extension and the following additional factors:

- a. the length of the Line Extension,
- b. the location of the Line Extension,
- c. the number of potential additional Customers that may benefit from the Line Extension,
- d. the type of Service requested, and
- e. any other factor that is reasonably considered to achieve a fair and reasonable allocation of costs.

5. Additional Customers requesting connection during the Refund Period shall pay their proportionate share of the Line Extension as set forth in the refund schedule before being connected to the facilities. The Company shall refund such payments only to the Initial Customer and shall not make or collect refund payments for payment to the Initial Customer's successors, assigns, or heirs.

6. Notwithstanding the other provisions of Rule 15 H. the Company shall have no obligation to the Initial Customer for payment of refunds that it is unable to collect from an Additional Customer for any reason and the Initial Customer shall pay the Company cost of collection including attorney fees.

H. <u>Service</u>. The Company's delivery of Electric Service to the Customer is conditioned upon the Customer complying with the provisions of the Agreement for Construction of Infrastructure and these Rules.

I. <u>Relocation or Modification of Existing Facilities</u>. If feasible, the Company shall relocate or modify existing facilities and/or remove existing overhead lines and install underground facilities at a Customer's request. The Customer shall be required to follow the procedures set forth in this Rule for requesting a Line Extension and pay all related costs and expenses prior to such relocation and/or underground conversion. The costs and expenses related to relocating or modifying existing facilities are not subject to the refund policy described in Section H above.

APPLICANT BUILT LINE EXTENSION AGREEMENT (SUBDIVISION DISTRIBUTION SYSTEM) between

Setween

HEBER LIGHT & POWER COMPANY

And

[DEVELOPER]

This Applicant Built Line Extension Agreement (Subdivision Distribution System) ("Agreement"), dated as of ______, 20____ (the "Agreement Date"), is entered into by and between Heber Light & Power Company, a political subdivision of the State of Utah, specifically an Energy Services Interlocal Entity as defined in Utah Code § 11-13-102(7) ("Company"), and [Developer], a ______ ("Applicant"), for the construction of an electrical Distribution System (the "Line Extension") for Applicant's development to be known as [Project Name] (the "Development"); located at or near [Project Address], in Wasatch County, Utah, for _____ lots within the Development. The location of the Development and lots within the Development as Exhibit A.

Applicant desires to build or contract with someone other than Company to build a primary or secondary voltage Line Extension. When the Applicant has completed construction of the Line Extension to Company's satisfaction, the Applicant will transfer ownership of the Line Extension to Company, and Company will connect it to Company's facilities, assume ownership, and provide electric service to the Applicant's facilities. It is expressly understood and agreed that the Company does not own the Line Extension during construction, nor does Company own the Line Extension after completion of construction unless and until it purchases the Line Extension as provided in this Agreement.

NOW, THERFORE, for good and valuable consideration, receipt and sufficiency of which is hereby acknowledged, the Applicant and Company agree as follows:

A. LINE EXTENSION CONSTRUCTION

- a. Line Extension Design and Estimate. The company designed the Line Extension and calculated the estimated cost of construction of the Line Extension to be <u>\$</u> (the "Line Extension Cost") using its standard estimating methods. The portion of the Line Extension Cost that Company would fund, if any, were this constructed by Company is the "Line Extension Allowance". The portion of the Line Extension Cost that Applicant would pay Company were this constructed by Company is the "Advance". Charges, reimbursements, and refunds under the Company's Line Extension rules, are calculated from the Line Extension Cost, Line Extension Allowance, and the Advance. The amount of the Advance is set forth in Section I. and the Line Extension Allowance is set forth in Section II.B on the Schedule of Charges attached to this Agreement as Exhibit B and incorporated into this Agreement by reference ("Exhibit B").
- b. Charges for Design and Estimating, Inspections, Connection Charges, and Other Charges.
 - i. The estimated cost for the Design and Estimating, Inspection, and Connection Charges are set forth in Section II.A on Exhibit B. Upon the execution of this Agreement, if the amount in Section II.A is larger than the amount in Section II.B on Exhibit B, the Applicant shall pay to Company the difference.

- ii. Applicant agrees to pay the Company's actual costs for inspection and Other Charges. The estimates of these costs are given in Exhibit B.
- iii. The payment using the actual costs shall be made as part of the transfer of ownership of the Line Extension from Applicant to Company. The payment may either be from Company to Applicant or from Applicant to Company as given on Exhibit B.
- **c.** Additional Facilities. The Applicant agrees to pay Company any additional costs incurred by Company arising from or relating to the Line Extension, including the installation of, or providing of, any additional facilities necessary to complete the Line Extension. Applicant agrees to make said payment within three (3) business days following receipt of a written request for payment, or absent such a request, Applicant agrees that the payment will be taken as an adjustment in the final refund/payment calculations.

d. Construction Standards.

- i. The Applicant must construct the Line Extension in strict accordance with Company's design, material specifications, and construction standards and along Company's selected route (together referred to as the "Construction Requirements"). Applicant agrees to be subject to inspections as deemed necessary by Company to ensure the quality of installed facilities and workmanship. Applicant will promptly repair and make corrections upon notice by Company's inspector of such need. Applicant will notify Company prior to commencing any construction activity. Otherwise, Company will not accept ownership of the Line Extension or energize the Line Extension.
- ii. The Applicant acknowledges receipt from Company of all information necessary for the Applicant to construct the Line Extension in strict compliance with the Construction Requirements. Such acknowledgment includes having returned to Company a signed original of the document titled, <u>Applicant Built Line Expectations</u> <u>And Requirements (Developers and Installation Contractors)</u>.
- iii. The Applicant is solely responsible for permits, authorizations, construction, materials, means, methods and techniques with respect to the Line Extension. Any inspections or reviews performed by Company or third parties will not relieve the Applicant of its responsibility and liability for such construction, materials, means, methods, and techniques.
- e. **Rights-of-Way**. At no cost to Company, the Applicant shall provide to Company all required rights-of-way, easements, and permits that Company in its sole discretion deems necessary or appropriate with respect to the Line Extension. Such rights of way, easements, and permits shall be in form and substance satisfactory to Company.
- f. Liability and Insurance. The Applicant or the Applicant's subcontractor(s) assumes all risks for the construction of the Line Extension. Before starting construction of the Line Extension, the Applicant or Applicant's subcontractors(s) performing the work as identified below will furnish Company with a certificate naming Company as an "additional insured" under a general liability insurance policy in a minimum amount of \$1,000,000. The Applicant or Applicant's subcontractors performing the work may not cancel such insurance policy before transfer of ownership of the Line Extension to Company, including execution of the Bill of Sale. Each of the subcontractors providing certificates of "additional insured" must enter into an agreement with Company and be accepted by Company as indicated by an executed Exhibit D, to be attached to this Agreement. Unless Applicant elects to furnish the certificate of

insurance, Applicant and Applicant's subcontractors shall not begin any construction activities until Exhibit D is fully executed. If Applicant furnishes such certificate of insurance, execution of Exhibit D is unnecessary.

g. Transfer of Ownership.

- i. The Applicant will notify Company's inspector verbally or in writing of completion of the construction of the Line Extension.
- ii. Once completion is verified by Company's inspector verbally or in writing, the Applicant will, within three (3) business days, provide Company with a bill of sale with an assignment of all warranties, a full warranty of title, substantially in the form attached as Exhibit C to this Agreement and incorporated into this Agreement by reference (the "Bill of Sale"), and such other documents that Company deems necessary and appropriate to transfer ownership of the Line Extension to Company with good and marketable title, free and clear of any and all liens, claims, security interests, pledges, charges, taxes, and any other encumbrances of any nature whatsoever; and
- iii. Within five (5) business days following receipt of the Bill of Sale, Company will schedule the work to energize the Line Extension. Company is under no obligation to accept the Bill of Sale before full and complete satisfaction of all of the Applicant's obligations arising under or relating to this Agreement.
- h. Deficiencies in Construction/Warranty. The Applicant warrants that all materials will be new unless otherwise specified, and that all work will be of the best quality, free from faults and defects and in strict conformance with the Construction Requirements. If, prior to or within twenty-four (24) months from the date that Company energizes the Line Extension, Company determines that the Applicant provided deficient material or workmanship or material or workmanship not strictly in accordance with the Construction Requirements or Company's standards, the Applicant must reimburse Company or pay the cost to correct the deficiency or, in the sole discretion of Company, repair or replace the defective material or workmanship promptly. Company may, in its sole discretion, deduct the cost of any connection from any payment, refundable advance, or any other amount due from Company to the Applicant. This warranty is in addition to, and not in lieu of, other remedies provided by law, all of which Company explicitly reserves. This warranty shall in no way be deemed to shorten the limitation periods of the other remedies available to Company.
- i. Indemnity. The Applicant will reimburse, indemnify, defend (with counsel approved by Company) and hold Company, and its respective employees, officers, directors, representatives, agents, successors, and assigns, harmless from and against any and all claims, actions, obligations, liabilities, losses, damages, costs and expenses (including reasonable legal fees) resulting from or relating to the Applicant's performance or failure to perform any of its obligations arising under or pertaining to this Agreement. This indemnity obligation shall continue after and survive the transfer of ownership of the Line Extension to Company. The transfer of ownership of the Line Extension to Company and Company's payment of the Line Extension Allowance shall not release, or be deemed a waiver of, Company's right to enforce the Applicant's indemnity obligations following such transfer of ownership.
- **j.** Line Extension Allowance. On acceptance of the Bill of Sale, Company will pay the Applicant the Line Extension Allowance not already paid or credited, less the cost of any unreimbursed equipment or services provided by Company, as the purchase price of the Line

Extension. If these other costs exceed the amount due Applicant, the Applicant will pay Company the difference. In no event shall the Line Extension Allowance exceed the Line Extension Cost.

k. Termination. If the Applicant fails to complete the Line Extension fully and finally to the satisfaction of Company in its sole discretion on or before 180 days after the Agreement Date, the Applicant expressly understands and agrees that Company is released from any obligations arising under or relating to this Agreement, including but not limited to payment of the Line Extension Allowance, and this Agreement shall be null and void and of no further force and effect.

B. ELECTRIC SERVICE

- **a.** Delivery of Power. 120/240 volt, single phase electric service will be provided to each of the residential lots at the lot line, with the capacity, placement and type of facilities given in Company's design.
- **b.** Final Grade. Applicant agrees to place at final grade transformer pads, vaults, junction boxes and other underground facilities as required by Company. If any change in grade, or property lines, or any surface improvements require Company to change its facilities, or causes additional cost to Company, Applicant agrees to reimburse Company for such change or cost.
- **c.** Underground Facilities. Company may abandon in place any underground cables installed in connection with the construction of the Line Extension that in Company's sole discretion become no longer useful.
- d. Backbone Advances and Refunds. The Backbone Advance given in Exhibit B, Section I, is used for line extension refund calculations. Applicant must initial their selected option on the blank space at the beginning of the option. Applicant trenching, conduit, vault and/or right-of-way ("TCVR"), when provided for Company primary lines and equipment outside the development or provided in order to serve customers outside the development, may also be subject to refund as calculated using Company standard costs.

Refunds. Applicant's effective advance for the purpose of line extension refunds, the Backbone Advance, is as given in Exhibit B. Applicant remains eligible for line extension and TCVR refunds. The Company will collect the refund amount from additional applicants connecting to the primary backbone outside the development. For these additional connections Company will pay the Applicant such amount collected:

- 1. after Company collects such amount; and
- 2. for four such additional connection(s) that connect to the Line Extension outside the Development within ten years from the date Company energizes the Line Extension.

_____ Contract Administration Credit. Applicant chooses to receive a Contract Administration Credit of \$250. Under this option the net advance or credit will be adjusted by the \$250 credit and Applicant waives their right to line extension and TCVR refunds should additional customers connect to this line.

e. Special Provisions: None

C. GENERAL

- **a. Regulatory Authority**. All provisions of this Agreement are subject to the jurisdiction of the Public Service Commission of Utah, as are the rates, rules, and regulations of Company's filed tariff which are incorporated into this Agreement by this reference. Company's tariff is available for review upon the Applicant's request.
- **b.** Effectiveness. Company will not be bound by the terms and provisions of this Agreement unless Company receives an original of this Agreement signed by the Applicant and payment of Payment 1 given in Exhibit B within ninety (90) days of the Agreement Date.
- **c. Assignment**. Company may at any time assign its rights and delegate its obligations under this Agreement to any: affiliate; successor in interest; corporation; or any other business entity in conjunction with a merger, consolidation or other business reorganization to which Company is a party.
- **d. Amendments and Waivers**. Any term of this Agreement may be amended or modified and the observance of any term of this Agreement may be waived (either generally or in a particular instance and either retroactively or prospectively) only in writing signed by the parties to this Agreement.
- e. Severability. If one or more provisions of this Agreement are held to be unenforceable under applicable law, such provision shall be excluded from this Agreement and the balance of the Agreement shall be interpreted as if such provision were so excluded and shall be enforceable in accordance with its terms.
- **f.** Legal Fees. The prevailing party in any proceeding required to enforce this Agreement shall be entitled to recover from the other all costs and expenses of enforcement, including reasonable legal fees prior to and at trial, on appeal, on any petition for review, in any arbitration, in any administrative or bankruptcy proceeding and in any other judicial, quasi-judicial or nonjudicial proceeding.
- g. Waiver of Jury Trial. To the fullest extent permitted by law, each of the parties hereto waives any right it may have to a trial by jury in respect of litigation directly or indirectly arising out of, under or in connection with this agreement. Each party further waives any right to consolidate any action in which a jury trial has been waived with any other action in which a jury trial cannot be or has not been waived.
- **h. Dispute Resolution.** If a dispute arises under or relates to this Agreement or the breach of this Agreement, and if such dispute cannot be settled through direct discussions, the Applicant and Company agree to first endeavor to settle the dispute in an amicable manner by mediation to be held in Heber City, Utah under the Commercial Mediation Rules of the American Arbitration Association before resorting to arbitration. Thereafter, any unresolved controversy or claim arising under or relating to this Agreement, or breach of this Agreement, shall be settled by arbitration to be held in Heber City, Utah in accordance with the Commercial Arbitration Rules of the American Arbitration Rules of the American Arbitration Association, and judgment on the award rendered by the arbitrator(s) may be entered in any court having jurisdiction.

- i. Notices. Any notice or notification required, permitted or contemplated under this Agreement shall be in writing, shall be addressed to the party to be notified at the address set forth below its respective signature line or at such other address as each party may designate for itself from time to time by notice under this Agreement, and shall be deemed to have been validly served, given or delivered (i) three business days following deposit in the United States mails, with first class postage prepaid, (ii) the next business day after such notice was delivered to a regularly scheduled overnight delivery carrier with delivery fees either prepaid or an arrangement, satisfactory with such carrier, made for the payment of such fees, or (iii) upon receipt of notice given by fax, mailgram, electronic mail, telegram, telex, or personal delivery.
- **j. Counterparts.** This Agreement may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument.
- **k. Governing Law.** This Agreement shall be construed and enforced under the laws of the State of Utah, exclusive of choice of law rules or principles.
- 1. Entire Agreement. This Agreement constitutes the entire agreement between the Applicant and Company with respect to the Line Extension and replaces all prior communications, whether oral or written, with regards to the Line Extension.

The Applicant and Company execute this Agreement as of the date given below Applicant's signature, or in absence of a date given there, the date given below Company's signature.

DESCRIPTION OF REAL PROPERTY

[INSERT PROPERTY DESCRIPTION]

EXHIBIT B

SCHEDULE OF CHARGES

CHARGES

I. Company Built Lines

If Company builds this Line Extension for Applicant, the Advance is:

Backbone Advance (primary backbone outside the development):

II. Applicant – Contracted Lines (Applicant Built Line)

If Applicant contracts to build the Line Extension, they will receive the Line Extension Allowance less Applicant Costs less applicable Other Charges as given below.

A. Applicant Costs for Applicant Built Line a. Design and Estimating b. Estimated Inspection Costs (based on _____ man hrs) c. Connection Charges *** TOTAL *** A =

B =

B. Line Extension Allowance

The Line Extension Allowance shall not exceed the applicable estimated job costs. The amounts in **II. Applicant Contracted Lines** are based on the estimated time and costs necessary to complete the work. Inspections will be trued up to actual costs.

OTHER CHARGES

There may be other charges for connection with the Line Extension, regardless of who builds it. Applicant is responsible to pay the sum of the actual costs of the charges of **III. Applicant Option** and **IV. Preexisting Line Under Contract** (together with the "**Other Charges**").

III. Applicant Option

Applicant has the responsibility of providing the following services. However, Applicant may request Company to provide them at Applicant's expense. The provision of such services by the Company is at the sole discretion of the Company, and such services may not be available from the Company. Applicant requests the following:

- ____ Company to procure right-of-way, including purchase and surveying. This will be based on *actual costs*. Company estimates these costs at:
- Company to obtain crossing permits, environmental surveys, surveys and other services necessary to cross other utilities, governmental land and other streets and highways. These will be based on *actual costs*. Company estimates these costs at:

TOTAL of III. Applicant Option

IV. Pre-Existing Line Under Contract For extensions that attach to a line where refunds are owed to the original customer(s) Applicant must advance the following: V. APPLICANT'S PRE-PAYMENT (section C.b of the Agreement) Applicant across to pay this amount before starting construction

Applicant agrees to pay this amount before starting construction ("Payment 1").

UPON COMPLETION OF THE LINE EXTENSION, Company will determine whether a payment is due to Applicant or whether Applicant owes Company. This is determined by **(B+Pmt 1) - (A+Other Charges)**, with **A.2** and **III** adjusted for actual costs. If this sum is positive Company pays this amount to Applicant. If the sum is negative, Applicant pays Company the sum of **(A+Other Charges) - (B+Pmt 1)**.

EXHIBIT C

BILL OF SALE

For valuable consideration, of which the undersigned acknowledges receipt, the undersigned sells, transfers, assigns, and conveys to Heber Light & Power, a political subdivision of the State of Utah, specifically an Energy Services Interlocal Entity as defined in Utah Code § 11-13-102(7) ("Company"), all of the undersigned's right, title and interest in and to the Line Extension located at or near [project address], in Wasatch County, State of Utah, which location is more specifically described in the attached Description of Real Property (Exhibit A), including but not limited to all fixtures, improvements, parts, equipment, machinery, and components of such Line Extension and all rights under any contracts or agreements or other intangible rights with respect to such Line Extension (the "Property").

The undersigned represents and warrants to Company that immediately prior to the execution of this Bill of Sale the undersigned had, and on the delivery to and receipt of this Bill of Sale by Company, Company will have, good, valid and marketable title to the Property, free and clear of any and all liens, claims, security interests, pledges, charges, taxes, and any other encumbrances of any nature whatsoever.

The undersigned shall duly execute and deliver or cause to be executed and delivered all instruments of sale, conveyance, transfer, and assignment and all notices, releases and other documents, including release of mechanic's lien(s), as may be necessary or appropriate in Company's discretion to transfer the ownership of the Property to Company or to otherwise effectuate the purposes of this Bill of Sale.

This instrument shall be construed and enforced in accordance with the laws of the State of Utah, exclusive of choice of law rules or principles.

EXHIBIT D

AGREEMENT TO PROVIDE LIABILITY INSURANCE CERTIFICATE

Pursuant to Section 6 of the Applicant Built Line Extension Agreement (Subdivision Distribution System), dated as of ______, 20____, (the "Agreement"), entered into between [Developer] ("Applicant"), and Heber Light & Power Company ("Company"), [Subcontractor] ("Subcontractor") agrees as follows:

Subcontractor assumes all risks for the construction of the Line Extension. Before starting construction of the Line Extension, Subcontractor performing the work as identified in the Agreement will furnish Company with a certificate naming Company as an "additional insured" under a general liability insurance policy in a minimum amount of \$1,000,000. Subcontractor agrees to maintain such insurance policy until after transfer of ownership of the Line Extension to Company by Applicant, including execution of the Bill of Sale.

Company agrees to accept Subcontractor's certificate. Company also agrees to notify Subcontractor upon execution of the Bill of Sale by written notice to Subcontractor's address as given below.

Subcontractor and Company execute this agreement as of the dates given below.

EXHIBIT E

DEVELOPER AGENT AUTHORIZATION

[Developer] ("Developer") wishes to enter into an Applicant Built Line Extension Agreement (Subdivision Distribution System) ("Agreement") with **Heber Light & Power Company** ("Company"), for an electric power distribution system for Developer's development to be known as **[Development Name]** ("Development") located at or near **[Address]**, for **_____** lots or parcels within the Development.

Developer has engaged **[Subcontractor]** ("Agent") as an agent of Developer and has authorized Agent to perform specific functions in the name of Developer, with Heber Light & Power Company, relating to electric service for the Development. Agent is authorized to conduct all matters checked below, in the name of and on behalf of Developer, pertaining to the Agreement beginning with **Date** and going forward.

- Participate in preliminary project information, design review, and pre-construction meetings
- Discuss and resolve issues related to design
- Review design documents and drawings and resolve issues
- **D** Execute the Line Extension Agreement
- □ Receive, review, and confirm material requirements list
- Communicate final developer-approved materials order
- **D** Receive and sign for material deliveries
- Conduct all construction/installation duties
- □ Resolve installation issues arising during construction period, including exceptions from Company's inspections
- Complete and submit for Final Completion Notice
- Complete and submit the Bill of Sale

Developer agrees that Agent, not Company, is responsible for providing copies of contracts, notices, correspondence and other communication between Company and Agent to Developer as agreed upon between Developer and Agent.

In the event that Developer terminates their agreement with Agent, developer will provide written, notarized, notice to Company to the mailing address given below, of said termination and provide the name and contact information of Developer's new agent or representative. Company will, after receipt of notice, conduct future business as noted above with new agent or representative of Developer. In case of change of Agent, Company will, upon request and upon payment of administrative costs, provide to Developer copies of contracts, notices, and correspondence between Company and Agent.

In the event of failure of Agent to perform, and upon notice to Developer by Company, Developer agrees to fulfill all commitments entered into by Agent for service to the Development.

Acknowledgments

Date Project Name: Work Order:

APPLICANT BUILT LINE EXPECTATIONS AND REQUIREMENTS

(Developers and Installation Contractors)

Heber Light & Power Company (the "Company") sets forth herein several expectations and requirements for both developers and their installation contractors to facilitate the Applicant Built Line (ABL) installation, inspection and connection processes. These expectations and requirements have arisen out of experience with past projects and implementation of improved business practices and are also intended to protect and preserve the quality of electrical installations delivered via the ABL approach. Failure of developers and installation contractors to comply with these expectations and requirements will put the inspection and connection of developer-built line extensions in jeopardy.

- 1. Contacts
 - a. Developers: The Company contact for project related topics is always [insert contact person]. ABL process topics (not project specific) should be addressed to [insert contact person].
 - b. Installation contractors: The Company contact for all project-related topics is always the [insert contact person]. Inspectors have responsibility for the quality of the final product and, as such, are responsible for responding to design and drawing interpretations, minor field changes and any other questions arising at the project site. Where inspectors do not have an immediate answer, they will seek out the proper response from the appropriate Company personnel. ABL process topics which are not project specific may be addressed to [insert contact person].
- 2. Licensing Requirements
 - a. All developers and installation contractors proposing to construct electric infrastructure for the Company shall possess a current and active E100 contractor's license issued by the State of Utah, which stipulates that: General Engineering Contractor means a person licensed under the Utah Construction Trades Licensing Act, Chapter 58-55-102.
 - b. A typical construction crew shall include a journeyman lineman, not more than two apprentice linemen per journeyman, equipment operators, ground men, and skilled helpers. A listing of individuals working on an ABL installation shall be provided to the Company prior to beginning work and shall be updated as needed. This listing shall include licensing and qualifications details for each individual.
 - c. Individuals such as equipment operators, ground men, skilled helpers, general laborers, etc., who will not be directly involved in the installation of electric infrastructure such as potential hot termination are not subject to the above licensing and qualification requirements.
 - d. All developers and contractors must be insured and shall possess applicable and verifiable experience constructing similar electric infrastructure used by the Company.
 - e. These licensing requirements apply to all contractors installing electric facilities for the Company under an Applicant Built Line Extension Agreement.
 - f. Developers and installation contractors shall complete projects according to the current version of Company standards. [Insert Hyperlink to HLP underground standards/instructions]
 - g. Developers and installation contractors shall comply with Heber Light & Power Construction Standards. Installation contractors should always use these standards as their primary reference regarding installation requirements. In rare cases, the inspector will be responsible for

communicating and documenting any variances that may be acceptable, thus allowing work to proceed.

- h. În general, all electrical facilities must comply with the National Electrical Safety Code (NESC), and current Company standards.
- 3. Journeyman Requirements
 - a. All journeyman linemen working on or around Company infrastructure must satisfactorily complete a journeyman lineman certification program approved by the United States Department of Labor, Office of Apprenticeship.
 - b. All journeyman linemen must have a working knowledge on the same type of infrastructure used by the Company.
 - c. Upon request by the Company, all journeyman linemen must pass a test administered by the Company, on an as needed basis. The test shall include both written and practical sections designed to demonstrate competence in all aspects of line work. Applicants failing the test shall be eligible to retake the test after one year.
- 4. Apprentice Requirements
 - a. An apprentice lineman shall be enrolled in a journeyman lineman certification program recognized by the United States Department of Labor.
 - b. Apprentices shall always work under the immediate supervision of a licensed journeyman lineman.
 - c. The Company may elect to place special restrictions and limitations on the type and scope of work that can be done under an approved training program.
- 5. Safety Requirements
 - a. All work and work practice by contractors and their employees shall meet or exceed the safety requirements of the most recent editions of the National Electrical Safety Code (NESC), Occupational Safety and Health Administration (OSHA) standards and Heber Light & Power Standards.
 - b. Failure to comply with safety standards will disqualify the contractor from installing or constructing electrical infrastructure for the Company.
- 6. Under the Company's rules for applicant-built lines, during construction and up until title to the facilities has been transferred to and accepted by the Company, the developer bears all responsibilities associated with risk of loss, liability, materials procurement, and storage, site security, contractor bidding and performance, construction practices, etc. Until the transfer and acceptance of the title, the project is entirely the responsibility of the developer and is not at any time considered Company work.
- 7. Developers may procure materials outside of the Company, if such materials are compliant with the Company's design, specifications, and material standards. Non-compliant materials will not be accepted.
- 8. Any anticipated installation changes of any degree from the design, including depth of trench or conduit, shall be reviewed with and approved by the inspector prior to installation. The inspector will compile all changes on a red-lined version of the design.
- 9. Installation contractors: Installation contractors are expected to possess a complete knowledge of the work and work processes, practices, and procedures required to install electric facilities including crew

structure and licensing as defined above. Company employees, agents, and contractors are not expected to provide work practice training or other project assistance.

- 10. Installation contractors: Inspectors are required to either be present or be notified whenever certain installation procedures are planned or in progress. Key installation steps requiring an inspector's presence include installing conduit (including road crossings), pulling cable, shading conduit, preparation and placement of switchgear, transformers, and secondary boxes, making up transformers, switchgear, etc. Inspectors are required to review not only the finished quality at the end product, but also to inspect the processes used and installation contractor skill sets employed to ensure a quality installation. Any of the above installations where notification of work anticipated or in progress has not been received will be subject to removal and proper re-installation with inspector on-site review.
- 11. Installation contractors are required to utilize special tools and equipment to ensure quality installation as follows:
 - a. Any cable cutting tool that results in a smooth cut
 - b. Split bell used in the conduit opening when pulling cable through conduit
 - c. Flexible cable guide (elephant's trunk) for cable protection when conduit opening does not provide a straightforward access
 - d. Cable pulling equipment for pulls through conduit longer than 50' or any conduit pull which includes bends: use either pulling sock/grip or multiple pulling eyes
 - e. Semi-conductor scoring tool
 - f. Insulation trimming tool
- 12. Since ABL work zones are not always monitored, there is a high potential for damage to facilities during the installation process. Developers and installation contractors are expected to at a minimum employ practices like those employed by the Company to protect materials & facilities during installation. Of special concern to the Company are electric cables lying on top of the ground where they are easily subject to damage.
- 13. Communications:
 - a. Installation contractors are expected to provide regular weekly notification (at a minimum) of installation status so that inspector can properly arrange their inspection schedule.
 - b. Any changes in installation dates and/or am/pm work schedules must be communicated to the inspector by either e-mail or telephone as soon as possible. The inspector will do their best to accommodate such requests.
 - c. The inspector's time is charged directly to the job and is a direct cost to the developer. It is therefore in the developer's interest to avoid having the inspector making unnecessary trips to the job site.
 - d. Include job name and phase in the subject line of any e-mail or other written communications.
- 14. Developers or their installation contractors must notify the inspector when all work is completed and ready for final inspection. The inspector will notify the developer or installation contractor if any additional work is required. Once work completion is verified by the inspector, the developer will submit the final bill of sale within three days to complete the property title transfer process and commence the connection and refund processes. Once the project is successfully energized, the Company will sign the bill of sale to indicate that all developer obligations have been completed. A copy of the final acceptance will be returned to the developer.
- 15. Special rules are in place for installation contractors who are also line service agreement contractors:

- a. To preserve the Company's independence and avoid potential conflicts of interest, line service agreement contractors desiring to contract with developers in performing applicant-built work must be aware of the work rules below. Contracting directly with the developer is considered non-Company work and the work rules below apply. Evidence of non-compliance to these work rules may result in the Company pursuing termination of the contract with the respective line service agreement contractor.
- b. Line service agreement contractors must refrain from:
 - i. Using Company provided materials that are stocked on vehicles in the installation of developer/applicant-built facilities.
 - ii. Accessing Company yards or facilities for purposes other than Company work.
 - iii. Utilizing Company yards and facilities for the storage or staging of non-Company materials or for storage of equipment used in non-Company work.
 - iv. Engaging Company employees in any way in the contractor's performance of non-Company work.
 - v. Discussing any aspect of the developer's work with Company employees unless properly authorized by a signed letter of agency from the developer.
 - vi. Using the Company's employees, materials, or the Company's relationship with the contractor in any way that creates a conflict of interest with the work the contractor is performing for the Company and the work being provided to the developer.
- 16. Heber Light & Power is always striving to improve its processes. Developers and installation contractors are welcome to offer input and suggestions to improve ABL related processes and to communicate those suggestions to the Company contact.

TEMPORARY CONSTRUCTION POWER:

TEMPORARY POWER WILL BE ON A CASE-BY-CASE BASIS AT HEBER LIGHT & POWER'S DISCRETION AND SHALL NOT LAST MORE THAN ONE YEAR.

PERMANENT POWER:

ALL PERMANENT ELECTRICAL SERVICE INSTALLATIONS SHALL MEET HEBER LIGHT & POWER SERVICE SPECIFICATIONS, NATIONAL ELECTRICAL CODE AND NATIONAL ELECTRICAL SAFETY CODE LATEST REVISIONS, NO CUSTOMER OWNED EQUIPMENT BETWEEN METER BASE AND METER. ADDRESS SHALL BE POSTED AT BUILDING SITE.

HEBER LIGHT & POWER SERVICE SPECIFICATIONS ARE PUBLISHED ON THE HEBER LIGHT & POWER WEBSITE UNDER DOCUMENT & POLICY LIBRARY-GENERAL INFORMATION (https://www.heberpower.com/company-information/documents-policy-library/.)

MAXIMUM RESIDENTIAL SERVICE IS SINGLE PHASE 800 AMPS.

IMPACT FEE APPLICATION MUST BE COMPLETED BY OWNER BUILDER\CONTRACTOR PRIOR TO CONNECTION OF PERMANENT ELECTRICAL SERVICE. INSPECTION FROM AUTHORITY HAVING JURISDICTION (THE LOCAL/MUNICIPAL INSPECTING AUTHORITY) MUST BE COMPLETED PRIOR TO CONNECTION OF PERMANENT ELECTRICAL SERVICE.

HEBER LIGHT & POWER SHALL INSPECT TRENCH AND CONDUIT INSTALLATION PRIOR TO BACKFILL. (CALL WITH 48 HOURS NOTICE TO SCHEDULE ELECTRICAL SERVICE TRENCH INSPECTIONS.) ANY BOXES SET BY DEVELOPER SHALL BE INSPECTED PRIOR TO BACKFILL.

ALL NEW DEVELOPMENTS WILL BE SERVICED UNDERGROUND; OWNER/DEVELOPER WILL BE RESPONSIBLE TO PROVIDE AND INSTALL ALL UNDERGROUND CONDUIT. TRANSFORMER PADS, SECONDARY JUNCTION BOXES, GROUND SLEEVE BASES AND SWITCH BASES WILL BE PROVIDED BY HEBER LIGHT & POWER AND INSTALLED BY CONTRACTOR. THE UNDERGROUND ELECTRICAL DISTRIBUTION LAYOUT SHALL BE COMPLETED BY OR APPROVED BY HEBER LIGHT & POWER.

ALL SERVICES REQUIRE SCH. 40 PVC CONDUIT AND RIGID METAL CONDUIT (RMC) LONG SWEEP (LS) 90 BEND AND RISER WITH LUG CONNECTION TO MAIN/METER BASE. FOR SINGLE FAMILY RESIDENTIAL SERVICE HEBER LIGHT & POWER WILL PROVIDE THE CONDUCTOR FROM THE SOURCE TO THE MAIN/METER BASE UP TO 200 FEET MAXIMUM (SEE 3.2.1-3.2.4, & 6.1.4. FOR LONGER LENGTHS CONSULT WITH HEBER LIGHT & POWER FOR ADDITIONAL COST).

FOR SINGLE FAMILY RESIDENTIAL SERVICE HEBER LIGHT & POWER WILL DO THE INITIAL WIRE PULL. AFTER INITIAL INSTALLATION THE CUSTOMER WILL BE RESPONSIBLE FOR ALL COSTS TO MAINTAIN/REPLACE CONDUIT AND CONDUCTOR FROM THEIR RESIDENCE UP TO THE SECONDARY BOX, TRANSFORMER OR POWER SERVICE MAST (I.E., THE POWER SOURCE.) TEMPORARY FIXES BY HEBER LIGHT & POWER WILL ONLY BE FOR 30 DAYS MAXIMUM.

THE DEVELOPER/CONTRACTOR SHALL BE CHARGED FOR ALL BROKEN/DAMAGED EQUIPMENT UP TO THE TIME THE HOMEOWNER TAKES OCCUPANCY.

GENERAL RULES FOR THE SERVICE LOCATION ARE AS FOLLOWS: THE METER AND MAIN DISCONNECT SHALL BE SETBACK FROM THE FRONT CORNER OF THE STRUCTURE A MAXIMUM OF 15 FEET. METER SHALL BE A MINIMUM OF 3 FEET AWAY FROM GAS SERVICE AND 3 FEET AWAY FROM WINDOWS THAT OPEN AND FROM DOORS.

THE METER & MAIN DISCONNECT SHALL BE ON THE SIDE OF THE STRUCTURE CLOSEST TO THE DISTRIBUTION POWER SOURCE INTENDED FOR THAT SITE. IF A STUB-OUT IS AVAILABLE IT SHALL BE USED. METER SHALL NOT BE LOCATED MORE THAN 200 FEET FROM THE DISTRIBUTION POWER SOURCE. IF IT IS MORE THAN 200 FEET, ADDITIONAL LINE EXTENSION COSTS WILL BE AT CUSTOMER'S EXPENSE.

RESIDENTIAL POWER SERVICE

BY: JB/MA

REV. 0.00

DATE: 1/11/25

TEMPORARY CONSTRUCTION POWER:

ALL TEMPORARY ELECTRICAL SERVICE INSTALLATIONS SHALL MEET HEBER LIGHT & POWER SPECIFICATIONS, NATIONAL ELECTRICAL CODE, AND NATIONAL ELECTRICAL SAFETY CODE LATEST REVISIONS. ADDRESS SHALL BE POSTED AT BUILDING SITE.

TEMPORARY POWER WILL BE ON A CASE-BY-CASE BASIS AT HEBER LIGHT & POWER'S DISCRETION. HEBER LIGHT & POWER REQUIRES OWNER\BUILDER TO SUPPLY AND INSTALL THE PERMANENT SERVICE INCLUDING METER BASE, DISCONNECTS AND OUTLETS. (SEE DETAIL 3.2.1) OWNER\BUILDER SHALL HAVE A BUILDING PERMIT NUMBER PRIOR TO MAKING APPLICATION FOR TEMPORARY POWER.

OWNER SHALL GO TO https://www.heberpower.com/impact-fee-application/ TO MAKE APPLICATION FOR SERVICE OR CONTACT HEBER POWER & LIGHT AT (435) 654-1581.

TEMPORARY POWER CONNECTS FOR COMMERCIAL CONSTRUCTION MAY USE THE PERMANENT TRANSFORMER FOR THE PROJECT, OR RENT A TEMPORARY TRANSFORMER FROM HEBER LIGHT & POWER. SEE THE FEE SCHEDULE FOR CHARGES ASSOCIATED WITH TEMPORARY POWER. ADDITIONAL FEES MAY BE NECESSARY DEPENDING ON SIZE AND TYPE OF TEMPORARY POWER REQUEST.

PERMANENT POWER:

ALL PERMANENT ELECTRICAL SERVICE INSTALLATIONS SHALL MEET HEBER LIGHT & POWER SERVICE SPECIFICATIONS, NATIONAL ELECTRICAL CODE AND NATIONAL ELECTRICAL SAFETY CODE LATEST REVISIONS, NO CUSTOMER OWNED EQUIPMENT BETWEEN METER BASE AND METER. ADDRESS SHALL BE POSTED AT BUILDING SITE.

HEBER LIGHT & POWER SERVICE SPECIFICATIONS ARE PUBLISHED ON THE HEBER LIGHT & POWER WEBSITE UNDER DOCUMENT & POLICY LIBRARY-GENERAL INFORMATION (https://www.heberpower.com/company-information/documents-policy-library/)

APPLICATION FOR PERMANENT ELECTRICAL SERVICE MUST BE COMPLETED BY OWNER BUILDER\CONTRACTOR PRIOR TO CONNECTION OF PERMANENT ELECTRICAL SERVICE. INSPECTION FROM AUTHORITY HAVING JURISDICTION (THE LOCAL/MUNICIPAL INSPECTING AUTHORITY) MUST BE COMPLETED PRIOR TO CONNECTION OF PERMANENT ELECTRICAL SERVICE.

ANY STRUCTURE WITH MORE THAN ONE UNIT SHALL BANK METERS IN A CENTRAL LOCATION. SEE 6.1.4

HEBER LIGHT & POWER SHALL INSPECT TRENCH AND CONDUIT INSTALLATION PRIOR TO BACKFILL. (CALL WITH 48 HOURS NOTICE TO SCHEDULE ELECTRICAL SERVICE TRENCH INSPECTIONS)

GENERAL RULES FOR THE SERVICE LOCATION ARE AS FOLLOWS: THE METER AND MAIN DISCONNECT SHALL BE SETBACK FROM THE FRONT CORNER OF THE STRUCTURE A MAXIMUM OF 15 FEET. METER SHALL BE A MINIMUM OF 3 FEET AWAY FROM GAS SERVICE AND 3 FEET AWAY FROM WINDOWS THAT OPEN AND FROM DOORS.

THE METER & MAIN DISCONNECT SHALL BE ON THE SIDE OF THE STRUCTURE CLOSEST TO THE DISTRIBUTION POWER SOURCE INTENDED FOR THAT SITE. IF A STUB-OUT IS AVAILABLE IT SHALL BE USED. METER SHALL NOT BE LOCATED MORE THAN 200 FEET FROM THE DISTRIBUTION POWER SOURCE. IF IT IS MORE THAN 200 FEET, ADDITIONAL LINE EXTENSION COSTS WILL BE AT CUSTOMER'S EXPENSE.

ALL NEW DEVELOPMENTS WILL BE SERVICED UNDERGROUND; OWNER/DEVELOPER WILL BE RESPONSIBLE TO PROVIDE AND INSTALL ALL UNDERGROUND CONDUIT. TRANSFORMER PADS, SECONDARY JUNCTION BOXES, GROUND SLEEVE BASES AND SWITCH BASES WILL BE PROVIDED BY HEBER LIGHT & POWER AND INSTALLED BY CONTRACTOR. THE UNDERGROUND ELECTRICAL DISTRIBUTION LAYOUT SHALL BE COMPLETED BY OR APPROVED BY HEBER LIGHT & POWER.

ALL SERVICES REQUIRE SCH. 40 PVC CONDUIT AND RMC LONG SWEEP (LS) 90 BEND AND RISER WITH LUG CONNECTION TO MAIN/METER BASE, SUPPLIED AND INSTALLED BY THE OWNER/CONTRACTOR. FOR MULTI FAMILY UNITS AND COMMERCIAL INSTALLATIONS, THE SECONDARY CONDUCTOR SHALL BE SUPPLIED, INSTALLED (PULLED), TERMINATED & MAINTAINED BY OWNER / CONTRACTOR PER NEC, FROM THE METER BASE TO THE POWER SOURCE SUPPLIED BY HEBER LIGHT & POWER. AFTER INITIAL INSTALLATION THE CUSTOMER WILL BE RESPONSIBLE FOR ALL COSTS TO MAINTAIN/REPLACE CONDUIT AND CONDUCTOR FROM POWER SOURCE.

DEVELOPER/CONTRACTOR SHALL BE CHARGED FOR ALL BROKEN/DAMAGED EQUIPMENT UP TO THE TIME THE OWNER TAKES POSSESSION.

MULTI-FAMILY & COMMERCIAL POWER SERVICE

PRE-INSPECTIONS REQUIRED ON ALL SERVICE UPGRADES.

APPLICATION FOR ELECTRICAL SERVICE UPGRADE MUST BE COMPLETED BY OWNER/CONTRACTOR PRIOR TO ELECTRICAL SERVICE UPGRADE. ALL SERVICE UPGRADES REQUIRE A PRE-INSPECTION AND IMPACT FEE PAYMENT.

ALL ELECTRICAL SERVICE UPGRADE INSTALLATIONS SHALL MEET HEBER LIGHT & POWER / BUILDING INSPECTION SERVICE SPECIFICATIONS, NATIONAL ELECTRICAL CODE AND NATIONAL ELECTRICAL SAFETY CODE LATEST REVISIONS. ADDRESS SHALL BE POSTED AT BUILDING SITE.

METER & SERVICE LOCATIONS ARE TO BE DETERMINED BY HEBER LIGHT & POWER. GENERAL RULES FOR THE SERVICE LOCATION ARE AS FOLLOWS: THE METER AND MAIN DISCONNECT SHALL BE SETBACK FROM THE FRONT CORNER OF THE STRUCTURE A MAXIMUM OF 15 FEET. METER SHALL BE A MINIMUM OF 3 FEET AWAY FROM GAS SERVICE AND 3 FEET FROM WINDOWS THAT OPEN AND FROM DOORS. THE METER & MAIN DISCONNECT SHALL BE ON THE SIDE OF THE STRUCTURE CLOSEST TO THE DISTRIBUTION POWER SOURCE INTENDED FOR THAT SITE. IF A STUB-OUT IS AVAILABLE IT SHALL BE USED. METER SHALL NOT BE LOCATED MORE THAN 200 FEET FROM THE DISTRIBUTION POWER SOURCE. IF IT IS MORE THAN 200 FEET, ADDITIONAL LINE EXTENSION COSTS WILL BE AT CUSTOMER'S EXPENSE.

IF UPGRADING SERVICE, IT MUST COMPLY WITH CURRENT STANDARDS. SEE 3.2.2 FOR CURRENT REQUIREMENTS. ALL SERVICE UPGRADES NOT CONFORMING TO CURRENT HEBER LIGHT & POWER / BUILDING INSPECTION STANDARDS SHALL BE DENIED. LINE SIDE JUNCTION BOXES AND ELECTRICAL GUTTERS ARE NOT ALLOWED. ALL UNUSED ELECTRICAL EQUIPMENT SHALL BE REMOVED.

HEBER LIGHT & POWER SHALL INSPECT TRENCH AND CONDUIT INSTALLATION PRIOR TO BACKFILL. (CALL WITH 48 HOURS NOTICE TO SCHEDULE ELECTRICAL SERVICE TRENCH INSPECTIONS)

NOTE: FOR MULTI-METER INSTALLATIONS ALL METER BASES SHALL BE LABELED AS WELL AS EACH INSIDE BREAKER PANEL WITH A PERMANENT LABEL.

REQUIREMENTS & STANDARDS TRANSFORMER, **JUNCTION BOX & P.U.E. LOCATION**

(DEVELOPMENT WITH SWALE, NO CURB)

| DWG: | 4.1.8 | |
|-------|-------|--|
| D110. | | |

REV. 0.00

BY: JB/MA

- 5. REQUIRED ACCESS CLEARANCE FOR BOTH SIDES AND REAR OF PAD 3 FT. MIN.
- 6. REQUIRED ACCESS CLEARANCE IN FRONT OF PAD 10 FT. MINIMUM.

7. CONTRACTOR SHALL PULL AND TERMINATE SECONDARY CONDUCTORS ON ALL 3 PHASE TRANSFORMERS.

TRENCHING REQUIREMENTS

THE DEVELOPER SHALL PROVIDE TRENCHING FOR REQUIRED CONDUIT SYSTEMS AND INSTALL CONDUITS IN ACCORDANCE WITH HEBER LIGHT & POWER STANDARDS.

ALL TRENCHING SHALL CONFORM TO OSHA (CFR 29) REQUIREMENTS. TRENCHES SHALL BE 18" MINIMUM WIDTH, EXCEPT FOR RESIDENTIAL SERVICE TRENCH MAY BE 12" WIDTH. TRENCH DEPTH VARIES BASED ON THE CONDUIT SIZE AND QUANTITY. THE DEVELOPER/CONTRACTOR SHALL BE RESPONSIBLE FOR ALL SHORING AND PROJECT SAFETY COMPLIANCE.

TRENCHING FOR ELECTRICAL POWER CONDUITS SHALL BE LOCATED IN THE FRONT 3' (MINIMUM) OF THE PUBLIC UTILITY EASEMENT (PUE) PROVIDED BY THE OWNER/DEVELOPER. THE PUE IS TYPICALLY 10 FEET FROM THE BACK OF WALK. THE PUE MAY BE 15 FEET IN NON-TYPICAL SITUATIONS (SEE 4.1.8). CONDUITS SHALL BE PLACED, BEDDED AND MARKED WITH APPROVED RED WARNING TAPE AS SHOWN IN THE TRENCHING SECTION/DETAIL 4.2.2. CONDUIT MINIMUM DEPTH IS MEASURED FROM TOP OF CONDUIT TO FINISHED GRADE; 1 FOOT DEPTH PER 1 INCH OF NOMINAL CONDUIT DIAMETER.

ALL BACKFILL MATERIAL SHALL BE COMPACTED. IN AREAS OF THE TRENCH WHERE THERE IS NO EQUIPMENT, PAVING OR OTHER STRUCTURAL REQUIREMENT, THE NATIVE MATERIAL MAY BE USED AS BACK-FILL, PROVIDED IT HAS NO COBBLES, CONSTRUCTION WASTE OR OTHER REFUSE OR DELETERIOUS MATERIALS. EXCAVATED AREAS THAT SUPPORT ELECTRICAL EQUIPMENT, PAVEMENTS, WALKS, ETC. SHALL BE BACKFILLED WITH COMPACTED STRUCTURAL FILL. BACKFILL SHALL BE COMPACTED IN LIFTS NO MORE THAN 2 FEET WITH THE FIRST LIFT BEING VISUALLY INSPECTED, AND THE FINAL COMPACTION SHALL BE 95% OF THE MAXIMUM DRY DENSITY AS DETERMINED BY ASHTO T-99.

ALL CONDUIT SHALL BE BEDDED IN NON-NATIVE MATERIAL- 6" BELOW & 12" ABOVE-SUCH AT MARKER SAND OR $\frac{1}{4}$ " MINUS PEA GRAVEL.

JOINT TRENCH USE: JOINT USE OF THE TRENCH WITH OTHER UTILITIES IS TYPICALLY NOT ALLOWED. HOWEVER, JOINT USE OF THE POWER TRENCH FOR COMMUNICATIONS IS APPROVED FOR AREAS OF NEW CONSTRUCTION IF 1' HORIZONTAL CLEARANCE CAN BE ACHIEVED. A SEPARATE TRENCH IS REQUIRED FOR NON-ELECTRIC UTILITIES SUCH AS GAS (3' MIN.), SEWER (1' MIN.), AND WATER (1' MIN.).

UTAH LAW SECTION 54-8A-1 THROUGH 54-8-A-11 REQUIRES THAT BLUE STAKES ONE-CALL LOCATION CENTER BE NOTIFIED AT LEAST THREE (3) WORKING DAYS PRIOR TO EXCAVATION.

CONDUIT REQUIREMENTS

TRENCHING AND POWER CONDUIT PLACEMENT SHALL BE DONE <u>AFTER</u> THE CURB AND SIDEWALK IS IN PLACE TO ASSURE PROPER ALIGNMENT IN THE PUE AND VERTICAL LOCATION OF EQUIPMENT. CONDUIT MUST BE PLACED AFTER CURB AND SIDEWALK. THE DEVELOPER IS RESPONSIBLE FOR CORRECT PLACEMENT. ANY CONDUIT WITH INADEQUATE COVER, OR EQUIPMENT MISPLACED IN ELEVATION OR ALIGNMENT SHALL BE REPLACED AT THE DEVELOPERS EXPENSE.

ALL CONDUIT SHALL BE SCHEDULE 40 PVC GRAY FOR ELECTRICAL USE. ELBOW (90 DEGREE) FITTINGS AND OTHER DIRECTIONAL CHANGE FITTINGS (45 OR 22.5 DEGREE) FOR CONDUITS 4" AND 6" DIAMETER SHALL BE PVC AND SHALL HAVE A LONG SWEEP RADIUS OF 36 INCHES. VERTICAL ELBOWS 4"-6" SHALL HAVE $\frac{1}{2}$ YARD FLOWABLE FILL THRUST BLOCK ON THE INSIDE OF THE RADIUS NOT TO OBSTRUCT JOINTS SO AS TO IMPROVE RESISTANCE TO FORCES GENERATED WHEN PULLING ELECTRICAL CABLES. SEE 4.2.3

FOR CONDUITS 3" DIAMETER, PVC SCHEDULE 40 FITTINGS ARE ACCEPTABLE. ALL BENDS MUST BE LONG SWEEP--WITH MINIMUM RADIUS OF 36 INCHES FOR 3". ALL RMC CONDUITS (SERVICE RISERS, PRIMARY RISERS) SHALL BE TERMINATED WITH PVC BUSHINGS.

CONDUIT SHALL BE PLACED STRAIGHT AND TRUE. CONTRACTOR SHALL KEEP THE INTERIOR OF THE CONDUIT CLEAN AND FREE OF DIRT ROCKS AND DEBRIS. PLUGGED, BROKEN, OR OTHERWISE UNSUITABLE CONDUITS SHALL BE REPLACED AT THE DEVELOPERS EXPENSE. CONDUIT ENDS SHALL BE CAPPED OR TAPED. CONDUIT STUBBED SHALL BE CAPPED AND SUITABLY MARKED AT THE GROUND SURFACE.

MULE TAPE MUST BE INSTALLED WITH ALL POWER CONDUIT. POWER WILL NOT BE INSTALLED UNTIL ALL CRITERIA ARE MET.

DIRECTIONAL BORING MAY BE USED AT SUITABLE LOCATIONS WHERE EXCAVATION IS NOT POSSIBLE, PROBLEMATIC, OR ECONOMICALLY INFEASIBLE. ALL SIZES BORING CONDUIT SHALL BE "STRAIGHT STICK" WELDED SEAM WITH THE INSIDE SEAM REAMED TO PROVIDE A SMOOTH AND CONSISTENT INSIDE DIAMETER. ALL HDPE SHALL BE BEVELED INSIDE PIPE AT A 45 DEGREE ANGLE AT ALL FITTINGS, CONNECTIONS, AND WHERE BORE BORE PIPE AND PVC MEET. HDPE ID SHALL MATCH AS CLOSE AS POSSIBLE TO PVC ID. CONTACT HEBER LIGHT & POWER FOR APPROVAL OF PROPOSED SOLUTION.

THE CONTRACTOR SHALL PERFORM MANDREL TESTING ON HPDE BORED CONDUIT WITH THE HEBER LIGHT & POWER INSPECTOR ON SITE. SEE DRAWING 4.2.4

FROM TRANSFORMERS (LOCATED IN THE P.U.E.)

BY: JB/MA

DATE: 2/7/25

SERVICE DROP CONDUCTORS SHALL NOT BE READILY ACCESSIBLE.

NOTES:

- 1. IF A ROOF OR BALCONY IS NOT READILY ACCESSIBLE TO PEDESTRIANS AND THE SERVICE CABLE IS MULTIPLEX (UP TO 600 VOLTS) OR IS INSULATED OPEN WIRE (UP TO 300 VOLTS BETWEEN CONDUCTORS, I.E. NOT INCLUDING 480 VOLT WYE OR DELTA), THE CLEARANCE MAY BE A MINIMUM OF 3 FEET PER NESC 234C3d(1) EXCEPTION 2. (NEC 230-24 ALSO REQUIRES 3' MINIMUM FOR UP TO 300 VOLTS BETWEEN CONDUCTORS AND A ROOF SLOPE OF AT LEAST 4" IN 12" TO BE CONSIDERED NOT ACCESSIBLE TO PEDESTRIANS.) NESC DEFINES A ROOF OR BALCONY READILY ACCESSIBLE TO PEDESTRIANS IF IT CAN BE CASUALLY ACCESSED THROUGH A DOORWAY, WINDOW, RAMP, STAIRWAY, OR PERMANENT LADDER (WITH ITS BOTTOM RUNG LESS THAN 8' FROM GROUND OR FROM PERMANENT ACCESSIBLE SURFACE) BY A PERSON, ON FOOT, WHO NEITHER EXERTS EXTRAORDINARY PHYSICAL EFFORT NOR EMPLOYS SPECIAL TOOLS OR DEVICES TO GAIN ENTRY. NESC SHALL GOVERN FROM THE UTILITY'S POLE TO THE DRIP LOOP AT THE CUSTOMER'S SERVICE ENTRANCE; NEC SHALL GOVERN FROM THAT DRIP LOOP INTO THE BUILDING.
- 2. WHERE NOT MORE THAN 6 FEET (MEASURED HORIZONTALLY) OF A SERVICE DROP PASSES OVER A ROOF TO TERMINATE AT A (THROUGH-THE-ROOF) SERVICE RACEWAY OR APPROVED SUPPORT LOCATED NOT MORE THAN 4' MEASURED HORIZONTALLY FROM THE NEAREST EDGE OF ROOF AND THE CABLE IS EITHER MULTIPLEX (UP TO 600 VOLTS), OR IS INSULATED OPEN WIRE (UP TO 300 VOLTS BETWEEN CONDUCTORS, I.E. NOT INCLUDING 480 VOLT WYE OR DELTA), THE CLEARANCE ABOVE THE ROOF MAY BE A MINIMUM OF 18". SEE THE PLAN VIEW SKETCH BELOW. (NEC 230-24 ALLOWS THE SAME 18" CLEARANCE FOR SERVICES UP TO 300 VOLTS BETWEEN CONDUCTORS AND SIMILAR OVERHANG.)

3. A CLEARANCE OF 3 FEET IN ANY DIRECTION FROM WINDOWS, DOORS, FIRE ESCAPES, OR SIMILAR LOCATIONS IS REQUIRED, EXCEPT IT DOES NOT APPLY TO: A. MULTIPLEX CABLE ABOVE THE TOP OF A WINDOW, OR

B. WINDOWS THAT DO NOT OPEN.

(NEC 230-9 REQUIRES THE SAME 3' OF CLEARANCE EXCEPT ABOVE THE TOP LEVEL OF A WINDOW; SERVICE CONDUCTORS ARE NOT ALLOWED BELOW WINDOWS OR OPENINGS THROUGH WHICH MATERIALS MAY BE MOVED, E.G. IN FARM OR COMMERCIAL BUILDINGS.)

4. PER NESC RULE 235C1 (EXCEPTION 3) A SPACE OF NOT LESS THAN 12" IS REQUIRED BETWEEN ELECTRIC SERVICE DROPS OF 0-600 VOLTS RUNNING ABOVE AND PARALLEL TO COMMUNICATION SERVICE DROPS. THIS APPLIES TO ANY POINT IN THE SPAN AS WELL AS AT THE BUILDING ATTACHMENT. OTHER CLEARANCES APPLY AT THE POLE. IF THESE SERVICES ARE RUN FROM DIFFERENT SUPPORT STRUCTURES, NESC TABLE 233-1 REQUIRES 24" VERTICAL CLEARANCE BETWEEN CONDUCTORS. COMMUNICATION CABLES SHOULD BE INSTALLED BELOW POWER SUPPLY CONDUCTORS WHENEVER POSSIBLE.

CAUTION:

ALL NESC VERTICAL CLEARANCES APPLY TO THE CONDUCTORS AT MAXIMUM FINAL SAG. ALLOW FOR 1.0 FOOT OF ADDITIONAL SAG FOR INCREASE FROM INITIAL SAG TO MAXIMUM FINAL CONDITIONS.

REQUIREMENTS & STANDARDS CLEARANCES FOR SERVICE DROPS <600 VOLT FOR BUILDINGS, SIGNS & OTHER INSTALLATIONS

RESIDENTIAL & COMMERCIAL POWER SERVICE

REV. 0.00

BY: JB/MA

DATE: 2/7/25

CT-METERING REQUIRED:

CURRENT TRANSFORMER (C.T.) METERING IS REQUIRED WHEN A SINGLE-PHASE OR THREE-PHASE SERVICE EXCEEDS 400 AMPERES. FOR SERVICES OVER 800 AMPERES SEE SECTION ON SWITCHBOARD METERING.

MAIN SERVICE DISCONNECT IS REQUIRED TO BE OUTSIDE AT METER LOCATION. THE C.T. METERING EQUIPMENT SHALL BE MOUNTED IN A LOCATION APPROVED BY HEBER LIGHT & POWER. CURRENT TRANSFORMERS **SHALL NOT BE INSTALLED** INSIDE OF THE PAD MOUNT TRANSFORMER.

WHEN METERING EQUIPMENT IS INSTALLED AT A LOCATION WHERE IT MAY BE STRUCK BY A VEHICLE, THE CUSTOMER IS REQUIRED TO INSTALL AND MAINTAIN AN APPROVED BARRIER POST. BARRIER POST (6" DIAMETER, CONCRETE FILLED) WHERE METERING EQUIPMENT IS INSTALLED IN VEHICLE TRAFFIC AREA.

THE CUSTOMER SHALL PROVIDE AND INSTALL:

THE WEATHER TIGHT METALIC CABINET (NEMA 3R, EUSERC 316 OR EQUAL, 24" x 48" x 11" FOR SINGLE PHASE AND 36"x48"x11" FOR THREE PHASE MINIMUM) SEALABLE WITH A LOCKABLE HINGED DOOR, SECURELY MOUNTED ON A RIGID SURFACE. THE TOP OF THE CABINET SHALL BE NO MORE THAN 6 FEET FROM FINAL GRADE.

EUSERC APPROVED (EUSERC 328A FOR SINGLE PHASE, 329A FOR THREE PHASE) CURRENT TRANFORMER MOUNTING BASE RATED 50,000 AMPERE FAULT DUTY.

THE CURRENT TRANSFORMER METER SOCKET WITH A SPACE RESERVED BELOW THE SOCKET FOR A TEST SWITCH (EUSERC 339) SHALL BE MOUNTED SO THAT THE CENTER OF THE METER IS 5'4" MINIMUM FROM THE FINAL GRADE. METER SOCKETS WITH CIRCUIT CLOSURES OR BYPASS CLIPS **ARE NOT APPROVED.**

THE CONDUIT BETWEEN THE METER SOCKET AND THE C.T. CABINET. RIGID 1" MINIMUM WITH PROPER FITTINGS AND BUSHINGS, NOT TO EXCEED 12" IN LENGTH.

TERMINATE WITH APPROVED CONNECTORS THE CONDUCTORS BETWEEN THE TRANSFORMER AND THE LINE SIDE OF THE CURRENT TRANSFOMER-MOUNTING BASE.

TERMINATE WITH APPROVED CONNECTORS THE CONDUCTORS BETWEEN THE CUSTOMER PANEL AND THE LOAD SIDE OF THE CURRENT TRANSFORMER-MOUNTING BASE.

GROUNDING PER NEC (ARTICLE 250 GROUNDING) FOR ALL METER AND CURRENT TRANSFORMER ENCLOSURES. (SEE 7.4.1, 7.4.2)

HEBER LIGHT & POWER SHALL OWN, PROVIDE AND INSTALL:

THE METER AND TEST SWITCH. THE CURRENT TRANFORMERS. THE WIRING BETWEEN THE CURRENT TRANSFORMER AND THE METER SOCKET ENCLOSURE.

ANY CHANGES OR DEVIATIONS MUST HAVE PRIOR WRITTEN APPROVAL FROM HEBER LIGHT & POWER.

ELECTRICAL SERVICE REQUIREMENTS CT METERING 800 AMP MAX.

COMMERCIAL/1 PHASE-3 PHASE POWER SERVICE

BY: JB/MA

DATE:11/14/24

SWITCH BOARD METERING

A EUSERC (EUSERC 354 OUTDOOR) SWITCHBOARD METERING SECTION IS REQUIRED WHEN THE SERVICE ENTRANCE RATING IS GREATER THAN 800 AMPERES. THE METERING CURRENT TRANSFORMERS WILL BE LOCATED IN THE CURRENT TRANSFORMER COMPARTMENT. THE METER AND TEST SWITCH MAY BE MOUNTED ON THE HINGED COVER OF THE COMPARTMENT OR MOUNTED REMOTELY WITH HEBER LIGHT & POWER APPROVAL. THE AREA BELOW THIS COMPARTMENT'S BARRIER MAY BE USED AS A MAIN SWITCH (BREAKER) COMPARTMENT, OR A LOAD DISTRIBUTION COMPARTMENT. THE METERING COMPARTMENT SHALL BE ON THE SUPPLY SIDE OF THE MAIN SWITCH OR BREAKER.

THE MOUNTING PAD FOR ALL SWITCHBOARD METERING ENCLOSURES WILL BE A MINIMUM 4" THICK CONCRETE PAD, EXTENDING 3' IN FRONT OF THE ENCLOSURE TO ENSURE AN ADEQUATE AND SAFE WORK AREA.

THE CUSTOMER WILL PROVIDE AND INSTALL:

THE CONDUIT AND CONDUCTORS, A MAXIMUM OF 32 CONDUCTORS NOT TO EXCEED 750 MCM MAXIMUM, CONDUCTOR SIZED PER NEC ACCORDING TO THE FULL LOAD CAPACITY OF THE TRANSFORMER.

THE SWITCHBOARD SERVICE SECTION, CURRENT TRANSFORMER MOUNTING BASE, PANELS, PULLING SECTION SEPERATE FROM THE CT COMPARTMENT, METER SOCKET AND PROVISIONS FOR A TEST SWITCH.

CURRENT TRANSFORMER BUSS BARS, AND TERMINATING BOLTS MUST BE SECURED IN PLACE AND SHALL BE PROVIDED WITH NUTS, FLAT WASHER, SPRING WASHERS, AND ALL PARTS MUST BE PLATED TO PREVENT CORROSION. BUSS BARS ARE REQUIRED FROM THE PULL SECTION INTO THE SERVICE SECTION.

ALL PULL AND TERMINATION SECTIONS SHALL BE FULL FRONT ACCESS. COVER PANELS SHALL BE REMOVABLE, SEALABLE, AND PROVIDED WITH TWO LIFTING HANDLES, AND LIMITED TO 9 SQUARE FEET IN AREA.

ALL REMOVABLE PANELS AND COVERS TO THE COMPARTMENTS USED FOR TERMINATING OR ROUTING CONDUCTORS SHALL HAVE SEALING PROVISIONS.

GROUNDING MUST MEET NEC REQUIREMENTS. LUGS FOR TERMINATING THE CUSTOMER'S GROUND WIRE SHALL BE LOCATED OUTSIDE OF THE SEALABLE SECTION AND SHALL BE DESIGNED TO READILY PERMIT THE CUSTOMER'S NEUTRAL SYSTEM TO BE ISOLATED, WHEN NECESSARY, FROM HEBER LIGHT & POWER'S NEUTRAL.

THE NEC REQUIRES A CLEAR WORKSPACE OF 78" HIGH BY 70" WIDE BY 48" DEEP IN FRONT OF METERING EQUIPMENT.

HEBER LIGHT & POWER WILL OWN, PROVIDE AND INSTALL:

THE METER AND TEST SWITCH. THE CURRENT TRANSFORMERS. THE WIRING BETWEEN THE CURRENT TRANSFORMERS AND THE METER TEST SWITCH.

ANY CHANGES OR DEVIATIONS MUST HAVE PRIOR WRITTEN APPROVAL BY HEBER LIGHT & POWER METERING DEPARTMENT.

Agenda Item 4: Discuss and Review Risk Policy's

Board Meeting February 26,20253

Fleet Safety Program

Introduction This Fleet Safety Program outlines Heber Light & Power's commitment to maintaining a safe and efficient fleet of vehicles. It provides a structured approach to ensuring that all drivers, vehicles, and associated activities comply with regulatory standards, company policies, and best safety practices. The goal is to minimize risk, reduce accidents, and ensure the safety of all employees, contractors, and the public.

1. Management Policies on Fleet Safety

Heber Light & Power is fully committed to the safety of our employees, the integrity of our vehicles, and the welfare of the communities we serve. The following policies outline our approach:

- **Commitment to Safety:** The leadership team is dedicated to fostering a culture of safety, providing necessary resources, and ensuring that safety is a priority at every level of operation.
- **Accountability:** Managers and supervisors are accountable for enforcing safety policies, monitoring performance, and addressing any non-compliance.
- **Compliance with Laws and Regulations:** All operations will comply with federal, state, and local laws, including regulations set by the Department of Transportation (DOT), the Occupational Safety and Health Administration (OSHA), and other relevant agencies.
- **Continuous Improvement:** We strive to continuously improve our safety processes through regular reviews, feedback, and incorporation of new technologies or practices.

2. Driver Qualification Criteria

To ensure that only qualified drivers operate company vehicles, the following criteria must be met:

- **Valid License:** All drivers must possess a valid driver's license appropriate for the type of vehicle they will operate.
- **Driving Record:** Drivers must have a clean driving record with no major violations (e.g., DUIs, reckless driving, etc.) within the past three years.
- **Medical Fitness:** Drivers must meet the medical requirements as outlined by the DOT or relevant local authorities.
- **Background Check:** Drivers will undergo a comprehensive background check, including criminal history and employment verification, to ensure they meet company standards for safety and reliability.

3. Driver Training Requirements

All drivers must complete the following training:

- Initial Driver Training: Drivers must complete a company-specific orientation program, covering safety protocols, vehicle handling, accident avoidance techniques, and emergency procedures.
- **Ongoing Safety Training:** Drivers will participate in annual refresher courses covering defensive driving, risk management, and company-specific updates (such as policy changes or new vehicle technology).
- **Specialized Training:** For drivers operating specialized vehicles (e.g., trucks with hazardous materials), additional training and certifications will be required.
- **Technology Training:** Drivers will be trained in the use of any in-vehicle technology (e.g., GPS, telematics, or electronic logging devices) to improve safety and efficiency.

4. Supervision and Control

The following supervisory practices will be enforced to maintain fleet safety:

- **Performance Reviews:** Driver performance will be reviewed annually, based on safety metrics such as speeding violations, accident history, and adherence to scheduled maintenance.
- **Progressive Discipline:** A system of progressive discipline will be followed for any violations of safety policies, ranging from warnings to suspension or termination based on the severity of the infraction.
- **Driver Feedback:** Drivers will receive periodic feedback regarding their performance, and constructive discussions will be held to address areas of improvement.

5. Personal, Hired, and Non-Owned Vehicle Use Policy

The following guidelines govern the use of personal, hired, and non-owned vehicles for work purposes:

- **Personal Vehicle Use:** Employees who use their personal vehicles for company business must provide proof of insurance and meet the same driving qualifications as company vehicle drivers. Employees will be reimbursed for mileage as per company policy.
- **Hired or Leased Vehicles:** Employees must follow all safety and operational guidelines when using hired or leased vehicles. These vehicles must be regularly inspected and maintained according to the terms of the lease or rental agreement.

• **Non-Owned Vehicle Use:** Drivers of non-owned vehicles will be required to submit proof of valid insurance and undergo a safety inspection to ensure it meets the organization's operational standards.

6. Vehicle Maintenance

To ensure that vehicles remain in safe working condition, the following maintenance procedures will be followed:

- **Scheduled Maintenance:** All vehicles will undergo preventive maintenance at regular intervals based on manufacturer recommendations and usage levels.
- **Maintenance Logs:** A log will be maintained for each vehicle, documenting all repairs, inspections, and maintenance activities.
- **Parts and Equipment:** All replacement parts must meet the specifications outlined by the manufacturer to ensure vehicle safety and performance.
- **Pre-Trip Inspections:** Drivers are required to complete a pre-trip inspection before each use of the vehicle, checking key systems such as brakes, tires, lights, and fluid levels.

7. Vehicle Inspections

Regular inspections are critical for ensuring vehicle safety. The following procedures apply:

- **Daily Inspections:** Drivers must conduct a daily inspection of their vehicle before use, checking for defects or issues that may compromise safety.
- **Annual Safety Inspections:** An in-depth inspection by a certified technician will be performed annually to ensure that all vehicles comply with safety regulations.

8. Accident Reporting

In the event of an accident, the following steps must be taken:

- **Immediate Notification:** The driver must immediately notify their supervisor or designated contact within the company, regardless of the severity of the incident.
- Accident Report Form: Drivers must complete an accident report form as soon as possible after the incident, providing details such as the location, parties involved, and a description of the event.
- **Police Report:** If law enforcement is involved, the driver must provide the company with a copy of the police report.
- **Medical Assistance:** If anyone is injured, appropriate medical assistance must be sought immediately.

9. Accident Investigation

After an accident, the company will conduct a thorough investigation to determine the cause and implement corrective actions. The investigation process will include:

- Initial Assessment: The fleet safety manager or an appointed investigator will review the accident scene, collect evidence, and interview the driver and witnesses. An employee involved in any accident will be accompanied to the nearest facility that can perform a drug and alcohol test.
- **Root Cause Analysis:** The investigation will focus on identifying the root causes of the incident, including human error, vehicle failure, environmental factors, and other contributing elements.
- **Corrective Actions:** Based on the findings, corrective actions may include retraining, policy changes, or improvements to the vehicle fleet. If necessary, vehicles involved in the incident will be inspected to prevent future issues.
- **Reporting:** A detailed report outlining the accident findings, contributing factors, and actions taken will be provided to management.

Conclusion

This Fleet Safety Program provides a comprehensive framework for maintaining safe and compliant operations within our fleet. The organization is committed to implementing the outlined policies and continually improving fleet safety performance through ongoing monitoring, training, and regular evaluations. Through these efforts, we aim to create a safe working environment for all drivers, passengers, and the communities we serve.

Annual Vehicle Inspection Form

Vehicle Information:

- Make:_____
- Model: _____
- Year: _____
- VIN (Vehicle Identification Number): ____
- License Plate Number: ______
- Odometer Reading (Mileage): ______
- Inspection Date: ______
- Next Inspection Due: _____

Owner Information:

- Name: _____
- Address:
- Phone Number: _____
- Email Address: _____

Inspection Checklist

Exterior Condition:

- **Body** Check for any dents, rust, or significant damage.
- Windows Ensure all windows are free of cracks or chips.
- Mirrors Check if all mirrors are intact and adjusted properly.
- Lights Test headlights, tail lights, brake lights, turn signals, and hazard lights.

Tires:

- Tire Condition Check for wear, cracks, or cuts.
- **Tire Pressure** Ensure all tires are inflated to the recommended pressure.

• Tread Depth - Measure tread depth to ensure it meets safety standards.

Brakes:

- Brake Pads Inspect thickness and condition.
- Brake Fluid Check fluid levels and condition.
- Brake Performance Test for proper braking function.

Suspension:

- Shocks/Struts Inspect for leakage or damage.
- Suspension Components Check for worn-out bushings, joints, or ball joints.

Under the Hood:

- Engine Oil Check oil level and condition.
- Coolant Check coolant level and condition.
- Belts & Hoses Inspect for cracks, wear, or leaks.
- Battery Inspect battery terminals for corrosion and ensure it's securely mounted.
- Air Filter Inspect and replace if necessary.
- Fuel Lines Inspect for leaks or cracks.

Exhaust System:

- Exhaust Pipes Check for rust, leaks, or damage.
- Muffler Ensure no visible holes or damage.

Transmission & Drivetrain:

- Transmission Fluid Check levels and condition.
- Drive Belts/Chains Inspect for proper tension and wear.

Interior Condition:

- Dashboard Indicators Ensure all warning lights are functioning correctly.
- Seats & Seat Belts Check for any tears, damage, or improper function.
- HVAC System Test heating and air conditioning.
- Wipers & Washers Ensure the windshield wipers and washers are working.
- Horn Test horn functionality.

Road Test:

• Steering - Test for responsiveness and unusual noises.

- Alignment Check for proper alignment and smooth driving.
- **Transmission/Clutch** Test shifting for smooth operation.
- Suspension Noise Listen for any unusual noises while driving.

Inspector's Evaluation:

- Passed
- Failed

If failed, list issues:

Recommended Repairs/Service:

| Inspector's Name: | | | | |
|-------------------|--|--|--|--|
| Signature: | | | | |
| Date: | | | | |

Manager's Acknowledgment:

By signing below, I acknowledge that I have received a copy of this inspection report and understand the issues identified.

Manager's Signature: _____ Date: _____

Utility Truck with Boom - Annual Inspection Form

| Inspection Date: _ | |
|--------------------|--|
| Inspector Name: | |
| Truck ID/Plate #:_ | |
| Location: | |

Truck Exterior:

- **General Appearance** Check for damage or excessive wear to the body, bumper, and lights.
- Tires Inspect for wear, proper inflation, and any signs of damage or cracks.
- Lights Ensure all exterior lights (headlights, brake lights, turn signals, etc.) are functioning.
- Mirrors & Windshield Check for cracks, cleanliness, and secure mounting.
- Wipers & Fluid Inspect the condition of the windshield wipers and fluid levels.

Boom and Lift System:

- Boom Structure Inspect for cracks, corrosion, or damage to the boom and arm.
- Hydraulic Hoses Check for wear, leaks, and secure attachment.
- Hydraulic Fluid Level Ensure the fluid is at the correct level and no leaks are present.
- **Boom Movement** Test all boom movements (raise, lower, extend, retract, tilt) for smooth operation.
- **Boom Locking Mechanism** Check that locking mechanisms engage properly when the boom is not in use.
- **Insulation** If insulated boom, check for any visible damage or wear on the insulation.

Engine & Mechanical Systems:

- Engine Performance Check for any unusual sounds, leaks, or performance issues.
- **Battery** Inspect for corrosion, clean connections, and charge level.

- **Oil Level & Condition** Inspect oil level and look for any signs of contamination.
- Brakes Test and inspect brake pads, fluid levels, and overall brake system function.
- Transmission Check fluid levels and inspect for leaks or irregularities in shifting.

Electrical System:

- Lights and Indicators Test all dashboard lights and operational indicators.
- Horn & Emergency Signals Ensure the horn works and emergency signals are functional.
- Power Take-Off (PTO) Test PTO engagement and operation with boom system.

Safety Equipment:

- Fire Extinguisher Ensure it is properly charged and mounted.
- **First Aid Kit** Check contents and ensure everything is in good condition.
- Safety Harnesses/Belts Verify the condition and accessibility of all safety gear.
- Falling Object Protection Inspect for proper installation and condition (if applicable).
- Warning Lights & Reflectors Test emergency strobe lights, and ensure reflectors are visible.

Other:

- Work Area and Surface Condition Inspect the work platform and surface for wear and cleanliness.
- Cabin Condition Ensure the interior is in good condition (seatbelts, dashboard, controls).
- **Documentation** Confirm that inspection records and safety manuals are up to date and onboard.

Deficiencies Noted:

- _____

Action Taken / Recommendations:

• _____

•

Motor Vehicle Record (MVR) Review Guidelines

Purpose:

The purpose of these guidelines is to ensure that Motor Vehicle Records (MVRs) are reviewed fairly, consistently, and accurately to assess the driving eligibility and safety of drivers. These guidelines are designed to promote fair decision-making in the review process, ensuring that no driver is unfairly penalized or rewarded based on their driving history.

1. Eligibility Criteria for MVR Review

- MVRs should be reviewed for any driver who operates a company vehicle, is reimbursed for using a personal vehicle for business purposes or has been involved in an accident while performing work-related duties.
- MVRs must be checked periodically, ideally at the time of hiring and then at regular intervals (e.g., annually) to ensure up-to-date records.

2. MVR Content to be Reviewed

- **License Status:** Verify that the driver holds a valid, unexpired driver's license. Any suspensions, revocations, or restrictions must be addressed.
- Violation History: Review for any citations or violations, including speeding tickets, DUI/DWI offenses, reckless driving, or other traffic-related offenses.
- Accident History: Check for past accidents involving the driver, including at-fault accidents, and review the circumstances to assess patterns of unsafe driving behavior.
- **Points System:** Consider the number of points assigned to the driver for violations, as this can indicate the frequency and severity of offenses.
- **Endorsements or Restrictions:** Ensure any endorsements (e.g., commercial driver's license) or restrictions (e.g., corrective lenses) are documented and adhered to.

3. Consistency in Evaluation

- All MVRs should be evaluated according to the same criteria, irrespective of the individual's role or seniority within the organization.
- Establish a clear points-based system or categorization for violations, accidents, and other infractions to create a fair and uniform process for assessing records.

4. Reviewing Violations and Accidents

• **Minor Violations:** These include speeding tickets, parking tickets, or non-moving violations. Generally, a minor violation should not significantly impact eligibility unless patterns emerge.

- **Major Violations:** Serious offenses such as DUI/DWI, reckless driving, or other criminal violations should be reviewed in detail, as these offenses may disqualify a driver for safety and insurance purposes.
- Accidents: Determine fault and severity of the accident. A single accident may not be disqualifying, but multiple accidents, particularly those involving poor judgment, may raise concern. Review for contributing factors such as weather conditions, vehicle condition, and traffic circumstances.

5. Time Frames for Violations and Accidents

- Consider the time elapsed since a violation or accident occurred. Older infractions may be less significant unless they are part of a recurring pattern. For example:
 - **Recent Violations (Within 1 Year):** High priority for review and immediate action may be required.
 - **Moderate Violations (1-3 Years Old):** Consider past performance and frequency of violations.
 - Older Violations (Over 3 Years): Less weight should be placed on older violations unless they were particularly severe.

6. Severity of Violations

- Establish a scale for evaluating the severity of violations and accidents, such as:
 - **Low Severity:** Minor speeding tickets, minor accidents, or violations that do not indicate unsafe driving behavior.
 - **Moderate Severity:** Multiple minor violations or a single serious offense (e.g., license suspension).
 - **High Severity:** Major traffic violations or frequent accidents, especially if they indicate recklessness or a pattern of unsafe driving behavior.

7. Disqualification Criteria

Drivers should be disqualified from certain roles or driving privileges based on the following:

- A serious violation (e.g., DUI/DWI or reckless driving) within the last three years.
- Accumulation of a certain number of points within a year, as determined by the company's policy or local regulations.
- Multiple accidents within a short period or a pattern of at-fault accidents.

8. Appeal Process

Drivers should have the ability to contest the review of their MVR. An appeal process should be established that includes:

• A clear, written statement of grounds for the appeal.

- A timely review of the appeal by an impartial party.
- The opportunity for the driver to present additional documentation or context (e.g., a defensive driving course completion, extenuating circumstances of an accident).

9. Confidentiality

• MVRs are confidential and should only be accessed and reviewed by authorized personnel. All personal and identifying information should be handled in compliance with data privacy regulations.

10. Action Following MVR Review

- **Notification:** Drivers should be notified promptly of the results of the MVR review, especially if any negative implications arise.
- **Training or Corrective Action:** In cases of minor violations or accidents, the company may consider offering corrective measures such as defensive driving courses, mentorship programs, or temporary restrictions.
- **Termination of Driving Privileges:** For drivers with significant infractions or an unsatisfactory pattern of behavior, driving privileges may be revoked or limited, with appropriate alternatives offered where possible.

Conclusion:

These guidelines ensure that MVR reviews are conducted in a fair and consistent manner, promoting safety and accountability among all drivers. Adherence to these guidelines will help protect the organization from liability, reduce insurance costs, and promote a culture of safe driving.

Wildfire Management Program

1. Program Overview

This Wildfire Management Program outlines the procedures and actions to be followed in the prevention, detection, and response phases of wildfire management. It includes policies regarding safety, coordination, communication, and documentation to ensure effective action during wildfire events.

2. Policies

2.1 Prevention Policies

- **Fire-Resistant Landscaping**: Encourage the use of fire-resistant plants, materials, and spacing to reduce the risk of wildfire spreading near critical infrastructure.
- **Public Education**: Provide community outreach about fire safety measures, proper disposal of flammable materials, and fire prevention strategies.
- **Clearance Zones**: Require defensible space creation around structures, including the removal of dead vegetation, and ensuring properly maintained line clearances.

2.2 Detection Policies

- **Fire Monitoring**: Implement regular monitoring using technology like drones and satellite imagery for early detection of hotspots on existing structures.
- **Reporting System**: Create a reporting system where individuals can easily report potential fire hazards or sightings to relevant authorities.

2.3 Response Policies

- Incident Command System (ICS): Work with Wasatch Fire District's ICS framework for organizing, managing, and coordinating resources during wildfire incidents.
- **Evacuation Protocols**: Follow Wasatch Fire District evacuation routes and emergency shelters for at-risk populations and communities, ensuring clear communication.
- **Resource Allocation**: Prioritize resources (personnel, equipment, supplies) to areas of greatest need, based on either detection procedure hotspot identification or fire size and location.

3. Procedures

3.1 Fire Prevention Procedures

- **Routine Inspection**: Conduct annual inspections in high-risk areas to ensure proper system conformity and compliance with fire prevention standards.
- **Vegetation Management**: Inspect and clear designated line clearances regularly to prevent the inadvertent contact of vegetation with line electrical equipment.
- Hotspot Identification: Use aerial imagery to pinpoint areas with high heat signatures for targeted monitoring.
- Weather-related Shutoffs: Lines will be de-energized, particularly in high-risk areas, during high-wind and other threatening weather conditions.

4. Records of Actions Planned and Taken

4.1 Fire Prevention Records

• **Inspection Reports**: Document annual inspections of fire-prone areas and actions taken to address fire risks.

4.2 Fire Response Records

- Incident Action Plans (IAPs): For each equipment caused fire, keep an IAP documenting objectives, strategies, resources used, and key decisions made.
- **Deployment Logs**: Track the allocation of Company resources, including personnel and equipment, and document their involvement and length of focused efforts.

5. Review and Improvement

The Wildfire Management Program will undergo regular reviews and updates to incorporate lessons learned from past wildfire events, emerging technologies, and feedback from affected communities. Annual drills and training exercises will be conducted to ensure readiness and to identify any areas for improvement.

Power Equipment Fire Prevention Inspection Form

| Inspection Date: | |
|------------------------|--|
| Inspection Time: | |
| Inspector Name: | |
| Inspector ID: | |
| Location of Powerline: | |
| Weather Conditions: | |

- [] Clear
- [] Rainy
- [] Windy
- []Snowy
- Other: __

I. Powerline Structure Inspection

1. Powerline Condition

- Insulated wires in good condition
- No fraying or visible damage
- No signs of overheating (burn marks, discolored wires)
- Secure mounting of power poles

2. Vegetation Clearance

- Minimum clearance of 10 feet from trees or brush
- No overgrown vegetation near the powerline
- Vegetation cleared recently (date): ______

 Identified fire-prone vegetation in proximity to lines [] Yes [] No If Yes, Describe:

3. Firebreaks and Safety Zones

- Firebreaks in place around the powerline area
- Adequate safety zones established (no dry vegetation within 50 feet)

II. Equipment and Hardware Inspection

1. Transformers and Substations

- No oil leaks or overheating signs
- Proper grounding and clear of debris
- No visible damage or rust on metal parts
- Insulated wiring in good condition
- Grounding systems function correctly
- Emergency shut-off systems accessible and operational

2. Circuit Breakers and Fuses

- All circuit breakers in proper working condition
- Fuses are in place and undamaged
- No signs of wear or corrosion
- Fire extinguishers or suppression systems available near high-risk areas

III. Environmental and External Factors

1. Lightning Protection Systems

- Lightning arrestors installed
- Properly maintained and free from damage

2. External Fire Hazards

- Nearby industrial sites or equipment with potential fire risks
- Dry, windy conditions that may exacerbate fire spread

- Signs of previous fire damage (charred trees, scorched ground)
- Nearby fuel sources (gas, oil, flammable materials) [] Yes [] No If Yes, Describe: ______

IV. Safety Measures and Protocols

1. Inspection and Maintenance Frequency

- Routine inspections completed as scheduled
- Last maintenance date: _______
- Upcoming maintenance scheduled for: ______
- Emergency action plan reviewed and accessible [] Yes [] No

2. Training and Awareness

- Staff trained in fire prevention and safety protocols
- Fire safety equipment (extinguishers, blankets, etc.) readily available
- Emergency contact numbers clearly displayed

V. General Observations and Recommendations

• General Observations:

Truck 246

Public Hearing of the Rate Increase and Rate Implementation

Board Meeting February 26,2025

Heber Light & Power Draft Presentation

Electric Financial Projection and Cost of Service Study

Mark Beauchamp President, Utility Financial Solutions, LLC

Rate Study Process

| | Historic data used to project revenues and expenses for five years (2025 – 2029) |
|-------------------------|--|
| Financial Projectior | Capital improvement program |
| | Determination of financial targets |
| Cost of | Cost to provide service to each class of customers |
| Service | Monthly customer charges for each class |
| Rate | Balance movements toward cost of service with revenue requirements |
| Design | Current structures, demand options, TOU options |

Power Cost Adjustment

- Requesting to suspend the power cost adjustment until the Year 2 rate increase, due to the rate increase required in this current year.
- Prior to implementation of the power cost adjustment in Year 2, UFS will review HLP financials and assist with implementing the PCA.
- PCA base would be adjusted to reflect the Year 1 adjustment
 - Current base = \$0.0571 / Year 2 base = \$0.0631

Assumptions

February 2025

Jason Norlen General Manager Heber Light & Power 31 South 100 West Heber, UT 84032

Dear Mr. Norlen:

We are pleased to present the Report for the electric cost of service study and financial projection for Heber Light & Power (HL&P). This report was prepared to provide HL&P with a comprehensive examination of its existing rate structure by an outside party.

The specific purposes of this rate study are:

- Determine electric utility's revenue requirements for fiscal year 2025
- Identify cross-subsidies that may exist between rate classes
- Recommend rate adjustments needed to meet targeted revenue requirements
- Identify the appropriate monthly customer charge for each customer class

This report includes results of the electric cost of service study and financial projection and recommendations on future rate designs.

This report is intended for information and use by the utility and management for the purposes stated above and is not intended to be used by anyone except the specified parties.

Sincerely,

Utility Financial Solutions, LLC Mark Beauchamp CPA, MBA, CMA 185 Sun Meadow Ct Holland, MI 49424

1. Introduction

This report was prepared to provide Heber Light & Power (HL&P) with an electric cost of service study and financial projection, and a comprehensive examination of its existing rate structure by an outside party.

The specific purposes of the study are identified below:

- 1) **Determine electric utility's revenue requirements for fiscal year 2025.** HL&P's revenue requirements were projected for the period from 2025 2029 and included adjustments for the following:
 - a. Projected power costs
 - b. Projected changes in staffing levels
 - c. Capital improvement plan projected over next five years
- Identify if cross-subsidies exist between rate classes. Cross-subsidies exist when certain customer classes subsidize the electric costs of other customers. The rate study identifies if cross-subsidies exist and practical ways to reduce the subsidies. The cost of service study was completed using 2025 projected revenues and expenses. The financial projections are for the period from 2025 2029.
- 3) *Identify cost-based power supply and distribution rates.* The cost of providing electricity to customers consists of several components, including power generation, distribution, customer services, transmission, and transfers to the general fund. Electric unbundling identifies the cost of each component to assist the utility in preparing for electric restructuring and understanding its cost structure.
- 4) *Identify the appropriate monthly customer charge for each customer class.* The monthly customer charge consists of fixed costs to service customers that do not vary based on the amount of electricity used.
- 5) **Recommend rate adjustments needed to meet targeted revenue requirements.** The primary purpose of this study is to identify appropriate revenue requirements, and the rate adjustments needed to meet targeted revenue requirements. The report includes a long-term rate track for HL&P to help ensure the financial stability of the utility in future years.

2. Cost of Service Summary

Utility Rate Process

HL&P retained Utility Financial Solutions, LLC to review utility rates and cost of service and make recommendations on the appropriate course of action. This report includes results of the electric cost of service and unbundling study and recommendations on future rate designs.

Utility Revenue Requirements

To determine revenue requirements, the revenues and expenses for fiscal years 2022 and 2023, 2024 budget were analyzed, with adjustments made to reflect projected operating characteristics. *The projected financial statements are for cost of service purposes only.*

Table 1 is the projected financial statement for the Electric Department from 2025 – 2029.

The following pages review cash flow, debt coverage ratio, and rate of return which are important indicators of financial health.

Table 1 – Financial Statements (without rate adjustments)

Projected Cash Flow

Table 2 is the projected cash flow for 2025 – 2029, including projections of capital improvements as provided by HL&P. Changes in the capital improvement plan can greatly affect the cash balance and recommended minimum cash reserve target. The cash balance for 2025 is projected at \$26.43M and \$-9.16M in 2029. The recommended minimum cash reserve level for 2025 is \$16.57M and \$20.11M for 2029.

| Total Cash Available | \$ 26,433,686 | \$ 14,524,821 | \$ 12,045,940 | \$ (1,739,939) | \$ (9,160,871) |
| Recommended Minimum | \$ 16,570,554 | \$ 17,202,536 | \$ 18,271,753 | \$ 18,575,674 | \$ 20,113,185 |

Table 2 – Projected Cash Flows (without rate adjustments)

Cash balances fall below the minimum in 2026 and continue to decrease throughout the projection period.

HL&P intends to bond for capital projects between CY 2025 – CY 2029. The timing of the debt is shown in Table 3 below.

Table 3 – Anticipated Bonding and Related Capital

| | Bond Issues | | |
|----------|---------------|--------|-------|
| Calendar | Including | | |
| Year | Fees | Period | Rate |
| 2025 | \$ 26,010,000 | 25 | 5.00% |
| 2026 | | | |
| 2027 | 10,200,000 | 25 | 5.00% |
| 2028 | | | |
| 2029 | 18,360,000 | 25 | 5.00% |
| | | | |

Minimum Cash Reserve

Table 4 details the minimum level of cash reserves required to help ensure timely replacement of assets and to provide financial stability of the utility. The methodology used to establish this target is based on an assessment of working capital needs to fund operating expenses, capital improvements, annual debt service payments, and utility's exposure to risks related to catastrophic events, exposure to market risks, changes in fuel costs, loss of major customers, and utility's ability to timely recover changes in power supply expenses. Based on these assumptions, HL&P should maintain a minimum of \$16.57M in cash reserves for 2025 and \$20.11M in 2029.

Table 4 – Minimum Cash Reserves (without rate adjustments)

Projected cash balances fall below HLP's required minimum and UFS' recommended minimums beginning in 2026.

Debt Coverage Ratio

Table 5 is the projected debt coverage ratios with capital additions as provided by HL&P. Debt coverage ratio is a measurement of debt affordability and measures the cash flow from operations in that fiscal year. A ratio of 1, indicates there was enough cash flow from operations to pay the debt payment one time. The minimum recommended debt coverage ratio for prudent financial planning purposes is 1.40.

Maintaining a 1.40 debt coverage ratio is good business practice and helps to achieve the following:

- a. Helps to ensure debt coverage ratios are met in years when sales are low due to cold or wet summers or loss of a major customer(s).
- b. When debt coverage ratios are consistently met, it may help obtain a higher bond rating if revenue bonds are sold in the future, to lower interest cost.

Table 5 – Projected Debt Coverage Ratios (without rate adjustments)

When adjusting for capital contribution and impact fees, revenues that may vary from year to year, debt coverage is below the minimum for the projection period without changes in rates.

Rate of Return

The optimal target for setting rates is the establishment of a target operating income to help ensure the following:

- A. Funding of interest expense on the outstanding principal on debt. Interest expense is below the operating income line and needs to be recouped through the operating income balance.
- B. Funding of the inflationary increase on the assets invested in the system. The inflation on the replacement of assets invested in the utility should be recouped through the Operating Income.
- C. Funding of depreciation expense.
- D. Adequate rate of return on investment to help ensure current customers are paying their fair share of the use of the infrastructure and not deferring the charge to future generations.
- E. The rate of return identifies the target operating income and is used to identify the appropriate funding for replacement of existing infrastructure to recover in rates charged to customers.

As improvements are made to the system, the optimal operating income target will increase unless annual depreciation expense is greater than yearly capital improvements. The revenue requirements for the study are set on the utility basis. Table 6 identifies the utility basis target established for 2025 is \$4.15M and increases to \$6.93M in 2029.

| Rate of Return in % | Ŷ | 5.0% | <u>5.1%</u> | | Ŷ | 5.1% | | 5.1% | | <u>5 1,032,730</u> 5.1% | |

Table 6 – Rate of Return Calculation

Operating income is projected below the target operating income for each year.

Projected Rate Track

Adjusting system revenue requires balancing the financial health of the utility with the financial impact on customers and cost of service results. Table 7 is the summary financial projection without any rate changes. Cash balances, operating income and the debt coverage ratio fall to critical levels.

| | Projected | Debt | Adjusted | Target | | |
|----------|-------------|----------|------------|--------------|----------------|---------------|
| Calendar | Rate | Coverage | Operating | Operating | Projected Cash | Recommended |
| Year | Adjustments | Ratio | Income | Income | Balances | Minimum Cash |
| 2025 | 0.0% | 0.14 | \$ 149,219 | \$ 4,153,373 | \$ 26,433,686 | \$ 16,570,554 |
| 2026 | 0.0% | 0.54 | 2,230,598 | 4,752,057 | 14,524,821 | 17,202,536 |
| 2027 | 0.0% | 0.46 | 2,019,921 | 5,277,714 | 12,045,940 | 18,271,753 |
| 2028 | 0.0% | 0.48 | 1,940,086 | 5,877,475 | (1,739,939) | 18,575,674 |
| 2029 | 0.0% | 0.41 | 1,632,730 | 6,930,146 | (9,160,871) | 20,113,185 |

Table 7 – Summary of Financials without Rate Adjustment

The study identifies increasing current revenues in each year of the projection period to maintain financial targets. Table 8 is a summary of the financial results detailing the projected revenue adjustments.

Table 8 – Projected Revenue Adjustments

| | Projected | Debt | Adjusted | Target | | |
|----------|-------------|----------|--------------|--------------|----------------|---------------|
| Calendar | Rate | Coverage | Operating | Operating | Projected Cash | Recommended |
| Year | Adjustments | Ratio | Income | Income | Balances | Minimum Cash |
| 2025 | 13.0% | 0.80 | \$ 3,625,927 | \$ 4,153,373 | \$ 29,910,394 | \$ 16,570,554 |
| 2026 | 3.5% | 1.37 | 6,877,617 | 4,752,057 | 22,665,931 | 17,202,536 |
| 2027 | 3.5% | 1.42 | 8,059,881 | 5,277,714 | 26,267,715 | 18,271,753 |
| 2028 | 3.5% | 1.67 | 9,418,933 | 5,877,475 | 20,031,791 | 18,575,674 |
| 2029 | 3.5% | 1.59 | 10,676,691 | 6,930,146 | 21,754,979 | 20,113,185 |

This rate track ensures operating income and the projected cash balance increase through 2029. The projected cash balances would be above HLP's required minimum.

Due to cost changes, inflationary factors, and growth, financial projections should be reviewed on an annual basis. Depending on the system improvement timetable, additional changes may be needed throughout the projection period.

Debt to Equity Ratio

Debt to equity identifies the amount of existing infrastructure financed through debt and is used to determine the amount the system is leveraged in debt. For distribution systems the debt to equity ratio is normally between 30% and 35%. Table 9 details the debt/equity ratio.

| | Projected | Projected | Projected | Projected | Projected |
|--------------------------------------|---------------|---------------|----------------|----------------|----------------|
| Description | 2025 | 2026 | 2027 | 2028 | 2029 |

| System Equity | \$ (602,909) | \$ 10,948,640 | \$ 12,275,077 | \$ 25,217,348 | \$ 30,355,297 |
| Debt:Equity Ratio | 84% | 72% | 73% | 63% | 65% |

Table 9 – Debt/Equity Ratio

Age of Infrastructure

HL&P is currently 44% depreciated. Average infrastructure is approximately 50% to 55% depreciated, indicating HL&P has consistently funded replacement of infrastructure. Replacement of infrastructure tends to indicate the utility's ability to consistently provide a reliable system to customers, its ability to withstand catastrophic weather events, and unexpected replacement of system infrastructure. HL&P's system age indicates it will remain in the lower range of infrastructure age. Table 10 identifies the depreciated plant.

Table 10 – Age of Infrastructure

| | Projected | Projected | Projected | Projected | Projected |

| % Plant Depreciated | 44% | 43% | 41% | 40% | 38% |

Cost of Service Summary Results

A cost of service study was completed to determine the cost of providing service to each class of customers and to assist in the design of electric rates for customers. The cost of service study consists of the following general steps:

- 1) Determine utility revenue requirement for test year 2025.
- 2) Classify utility expenses into common cost pools.
- 3) Allocate costs to customer classes based on the classes' contribution to utility expenses.
- 4) Compare revenues received from each class to the cost of service.

The cost of service summary is included as Table 11 which compares the projected cost to serve each class with the revenue received from each class. The "% change" column is the revenue adjustment necessary to meet projected cost of service requirements. The cost of service summary uses the current rates, including any adjustment factors.

No utility charges 100% cost of service-based rates because retail rates are based on customers usage patterns that are largely driven by variations in weather. Due to these variations, it is recommended that rates move toward cost of service slowly with a general tolerance of a 10% variation between projected revenue and cost of service. The cost of service summary "% change" column indicates all major customer classes fall within this variation.

| | Cost of | | Projected | |
|----------------------------------|------------------|----|------------|----------|
| Customer Class | Service | F | Revenues | % Change |
| Street Lighting | \$ 156,140 | \$ | - | 0.0% |

| Residential TOU Demand | 543,899 | | 480,870 | 13.1% |
| Contract Customer 1 | 90,938 | | 39,394 | 130.8% |
| Total | \$ 30,742,685 | \$ | 26,739,586 | 15.0% |

Table 11 – Cost of Service Summary

Cost of Service Results

Table 12 shows the average cost of service per kWh and compares the cost to the average revenue per kWh for each customer class. This table is for information purposes only and is not used in the setting of rates. Average cost per kWh varies due to fixed cost recoveries such as meter costs and infrastructure needs of the customer. In general customer classes that use energy consistently have a lower average kWh cost to serve compared with customer classes that use energy only part of the day or year.

| | | | Projected |

Table 12 – Average Cost per kWh vs. Average Revenue per kWh

Cost differences result from usage patterns of customers and how efficiently each class of customers use facilities based on load data provided by HL&P.

Distribution Costs

Separation of distribution cost helps identify distribution charges for each customer class and the fixed monthly customer charge. Distribution rates include separation of the following costs:

- Operation and maintenance of distribution & transmission system
- Contributions to general fund
- Customer service
- Customer accounting
- Meter reading
- Billing
- Meter operation & maintenance
- Administrative expenses

The distribution rates consist of two components:

- Monthly customer charge to recover the costs of meter reading, billing, customer service, and a portion of maintenance and operations of the distribution system.
- Distribution rate based on billing parameters (kW or kWh) to recover the cost to operate and maintain the distribution system. Table 13 identifies the cost-based distribution rates for customer classes.

| | Monthly Customer | | Di | stribution | |
|----------------------------------|------------------|--------|----|------------|----------------------|
| Customer Class | (| Charge | | Rate | Billing Basis |
| Street Lighting | \$ | 896.17 | \$ | 0.0324 | kWh |
| Yard Lighting | | 890.34 | | 0.0323 | kWh |
| Residential Pumping | | 40.60 | | 10.25 | kW |
| Small General Service | | 47.94 | | 4.47 | kW |
| Small General Service Pumping | | 58.39 | | 8.14 | kW |
| Medium General Service | | 193.93 | | 7.86 | kW |
| Medium General Service Pumping | | 201.81 | | 6.49 | kW |
| Large General Service | | 471.15 | | 10.36 | kW |
| General Service Net Metering | | 51.07 | | 7.94 | kW |
| Electric Vehicle Charging | | 22.77 | | 5.02 | kW |
| Residential Demand | | 22.73 | | 3.56 | kW |
| Residential Demand over 400 AMPS | | 39.74 | | 8.44 | kW |
| Residential TOU Demand | | 22.72 | | 2.80 | kW |
| Contract Customer 1 | | 101.07 | | 16.23 | kW |
| | | | | | |

Table 13 – Distribution Costs by Customer Class (COS)

The cost of service based monthly customer charge for residential customers recovers 49% of the fixed cost of delivery of electricity. UFS averages across the United States show 40% to 60% fixed cost recovery in the residential customer charge.

Power Supply Costs

Table 14 identifies the average cost of providing power supply to customers of HL&P.

| Customer Class | De | mand | Billing Basis | I | Energy | Billing Basis |
|----------------------------------|----|-------|---------------|----|----------|---------------|
| Street Lighting | \$ | - | kWh | \$ | 0.0548 | kWh |
| Yard Lighting | | - | kWh | | 0.0548 | kWh |
| Residential Pumping | | 2.86 | KW | | 0.0608 | kWh |
| Small General Service | | 6.51 | KW | | 0.0557 | kWh |
| Small General Service Pumping | | 6.85 | KW | | 0.0601 | kWh |
| Medium General Service | | 9.25 | KW | | 0.0565 | kWh |
| Medium General Service Pumping | | 3.55 | KW | | 0.0628 | kWh |
| Large General Service | | 9.95 | KW | | 0.0565 | kWh |
| General Service Net Metering | | 7.82 | KW | | 0.0578 | kWh |
| Electric Vehicle Charging | | 5.30 | KW | | 0.0571 | kWh |
| Residential Demand | | 5.07 | KW | | 0.0568 | kWh |
| Residential Demand over 400 AMPS | | 11.24 | KW | | 0.0562 | kWh |
| Residential TOU Demand | | 3.60 | KW | | 0.0562 | kWh |
| Contract Customer 1 | | 5.25 | KW | | (0.0318) | kWh |

Table 14 – Power Supply Costs by Customer Class

Demand recovers costs for power supply and transmission fixed demand related costs. Energy is cost recovery for variable power supply costs.

Combined Cost Summary

Table 15 identifies the cost of service rates for each customer class. Charging these rates would directly match the cost of providing service to customers identified in this study.

| Current Average | | CO | S Customer | | | | |
|-----------------|------------------|---|--|--|--|--|---|
| Customer Charge | | Charge | | Demand | | Energy | |
| \$ | - | \$ | 896.17 | \$ | - | \$ | 0.0872 |
| | - | | 890.34 | | - | | 0.0871 |
| | 26.00 | | 40.60 | | 13.11 | | 0.0608 |
| | 24.70 | | 47.94 | | 10.97 | | 0.0557 |
| | 38.50 | | 58.39 | | 14.99 | | 0.0601 |
| | 145.00 | | 193.93 | | 17.11 | | 0.0565 |

Table 15 – Total Costs by Customer Class

Residential Customer Charge

The customer charge consists of expenses related to, 1) providing a minimum amount of electricity to the residential customer, and 2) expenses related to servicing a meter on the customer's premises; together they reflect the cost to deliver a single kWh of electricity to the customer. The methodology used in this study is consistent with methodologies and practices used in the electric industry.

The customer charge includes two types of charges called minimum system charges and direct charges.

Minimum System Charges:

The cost to provide the minimum level of service. HL&P provides wires to connect the transmission system to customer homes and businesses. This wire is required to provide even the minimal amount of service to a customer. For cost of service purposes, the total cost of the distribution infrastructure is broken into two components: 1) the minimum system costs, in effect to provide a customer with a single kWh of electricity which should be recovered through the customer charge, and 2) demand related costs to recover the additional infrastructure costs for when a customer uses more than a single kWh, which should be recovered through the usage component. The distribution system is sized to handle the customers' peak demands and the cost above the minimum system is recovered through the usage component (for residential customers this is included in the kWh charge).

The first step in identifying the cost related to the minimum system is obtaining information on the number and current replacement costs of HL&P distribution system. For example: UFS used information on the number and size of all the poles and the cost to replace the poles. The minimum size pole was identified and the cost to construct HL&P's system at the minimum sizing was determined. This process was completed for all HL&P's distribution system, including overhead and underground conductors and devices, line transformers, etc. Based on this methodology, 51% of HL&P's total distribution costs should be recovered by the usage component and 49% recovered in the fixed customer charge component.

Direct Charges

Costs related to maintaining a customer's account. These costs include the cost to operate and maintain the meter, including meter installation, meter repair and replacement costs, the cost to read the meter, billings and collections, customer service personnel to assist with questions and maintain the account, and the cost of the "service drop" to connect the home to the distribution line. These costs are direct costs of serving a residential account.

3. Functionalization of Costs

Delivery of electricity consists of many components that bring electricity from the power supply facilities to the communities and eventually into customer facilities. The facilities consist of four major components: transmission, distribution, customer-related services, and administration. Following are general descriptions of each of these facilities and the sub-breakdowns within each category.

Transmission

The transmission system is comprised of four types of subsystems that operate together:

- 1) Backbone and inter-tie transmission facilities are the network of high voltage facilities through which a utility's major production sources are integrated.
- 2) Generation set-up facilities are the substations through which power is transformed from a utility's generation voltages to its various transmission voltages.
- Sub-transmission plant consists of lower voltage facilities to transfer electric energy from convenient points on a utility's backbone system to its distribution system.
- Radial transmission facilities are those that are not networked with other transmission lines but are used to serve specific loads directly.

Operation of the transmission system also consists of providing certain services that ensure a stable supply of power. These services are typically referred to as ancillary services. The Federal Energy Regulatory Commission (FERC) has defined six ancillary service charges for the use of transmission facilities. For HL&P, these charges will be passed-through charges by the control area operator. Ancillary services consist of the following:

 Mandatory Ancillary Service Charges: Reactive Supply and Voltage Control Regulation and Frequency Response Service Energy Imbalance Charges Operating Reserves Spinning Operating Reserves Supplemental Reactive Power Supply Power losses from use of transmission system

Terminology of Cost of Service

FUNCTIONALIZATION – Cost data arranged by functional category (e.g., power supply, transmission, distribution

CLASSIFICATION – Assignment of functionalized costs to cost components (e.g., demand, energy and customer related).

ALLOCATION – Allocating classified costs to each class of service based on each class's contribution to that specific cost component.

DEMAND COSTS – Costs that vary with the maximum or peak usage. Measured in kilowatts (kW)

ENERGY COSTS – Costs that vary over an extended period of time. Measured in kilowatt-hours (kWh)

CUSTOMER COSTS – Costs that vary with the number of customers on the system (e.g. metering costs).

DIRECT ASSIGNMENT – Costs identified as belonging to a specific customer or group of customers.

Distribution

The distribution facilities connect the customer with the transmission grid to provide the customer with access to the electrical power that has been generated and transmitted. The distribution plant includes substations, primary and secondary conductors, poles, and line transformers that are jointly used and in the public right-of-way.

Substations typically separate the distribution plant from the transmission system. The substation power transformer "steps down" the voltage to a level that is more practical to install on and under city streets.

Distribution circuits are divided into primary and secondary voltages with the primary voltages usually ranging between 35 kV and 4 kV and the secondary below 4 kV.

Distribution Customer Types

Sub-transmission customers are served directly from the substation feeder and bypass both the secondary and primary distribution lines. The charges for this type of customer should reflect the cost of the substation and not include the cost of primary or secondary line charges.

Primary customers are typically referred to as customers who have purchased, owned, and maintained their own transformers that convert the voltage to the secondary voltage level. The rates for these customers should reflect the cost of substations and the cost of primary distribution lines and not include the cost of secondary line extensions.

Secondary customers have the services provided by the utilities directly into their facilities. The utility provides the customer with the transformer and the connection on the customers' facilities.

Customer-Related Services

Certain administrative-type services are necessary to ensure customers are provided service connections and disconnections in a timely manner and the facilities are in place to read meters and bill for customer usages. These services typically consist of the following components:

- Customer Services The cost of providing personnel to assist customers with questions and dispatch personnel to connect and disconnect meters.
- Billing and Collections The cost of billing and collections personnel, postage, and supplies.
- Meter Reading The cost of reading customers' meters.
- Meter Operation and Maintenance The cost of installing and maintaining customer meters.

Administrative Services

These costs are sometimes referred to as overhead costs and relate to functions that cannot be directlyattributed to any service. These costs are spread to the other services through an allocator such as labor, expenses, or total rate base. These costs may consist of City Commission expenses, property insurance, and wages for higher level management of the utility.

System Losses

As energy moves through each component of the transmission and distribution system, some of the power is lost and cannot be sold to customers. Losses vary based on time of day and season. Typically, as system usage increases or ambient temperature increases, the percentages of losses that occur also increase. These losses are recovered from distribution customers through an analysis of the peak losses that occur in the system. The average system losses and unaccounted for energy for HL&P are approximately 5.5%. (Typical municipal system losses are approximately 5.4%)

4. Unbundling Process

The cost of power supply, distribution, and customer services are identified as part of the unbundling process and are the first step in determining unbundled charges to customers. The total revenue requirements of \$30.74M are separated into four categories identified in Table 16.

| Expense Type | Amount | Percentage |
|---------------------------|---------------------|------------|
| Power Supply | \$ 19,729,955 | 64% |
| Distribution/Transmission | 8,149,815 | 27% |
| Customer Service | 2,862,916 | 9% |
| | Total \$ 30,742,685 | 100% |

Table 16 – Breakdown of HL&P Cost Structure

HL&P is projected to expend 64% of its total costs toward power supply. Distribution/transmission-related costs are 27%, and customer service 9%. These components are broken down into each of the subcomponents and are identified in the following sections.

Figure 1 – Breakdown of HL&P Cost Structure

Distribution Breakdown

Distribution rates consist of several different components. Total distribution-related costs of \$8.15M for 2025 are broken down into the main components including substations, transformers, and distribution lines. Figure 2 shows the breakdown of distribution components identified in the study.

Each of these components is allocated to customer groups based on certain factors established in the study. These factors are based on the efficiency of each customer class and the time of day or the season the electricity is used. Other factors are also considered, such as the length of line extensions to reach certain customer classes.

Report

Customer-Related Cost Breakdown

HL&P total expenses for customer-related costs are \$2.86M for 2025. The cost is broken down into the components identified in Figure 3.

Figure 3 – Breakdown of Customer Costs

Power Supply Cost Breakdown

Power supply costs for 2025 were made up of purchased power and fuel and internal generation expenses.

5. Significant Assumptions

This section outlines the procedures used to develop the cost of service and unbundling study for HL&P and the related significant assumptions.

Forecasted Operating Expenses

Forecasted expenses were based on 2022 and 2023, 2024 budget adjusted for power supply costs and inflation. The table below is a summary of the expenses used in the analysis. The projected operating expenses include an adjustment for any city contributions.

| <u> </u> | Projected | Projected | Projected | Projected | Projected |
|---|-----------------------|---------------|---------------|---------------|---------------|
| Description | 2025 | 2026 | 2027 | 2028 | 2029 |
| Operating Expenses: | | | | | |
| Purchases | | | | | |
| Purchased Power (Cost of Sales and Service) | \$ 12,594,117 | \$ 13,447,676 | \$ 14,481,545 | \$ 14,985,915 | \$ 15,570,075 |
| Energy Rebates | 60,665 | 63,319 | 65,201 | 65,510 | 66,084 |
| Purchase Power Direct - Jordanelle Energy | 1,712,507 | 1,826,195 | 1,947,431 | 2,005,854 | 2,066,030 |
| System Control and Load Dispatching | 989,092 | 1,054,755 | 1,124,777 | 1,158,520 | 1,193,276 |
| Production | | | | | |
| Gas Generation Fuel | \$ 2,379,917 | \$ 2,484,031 | \$ 2,557,872 | \$ 2,569,999 | \$ 2,592,511 |
| Gas Generation O&M | 679,791 | 724,921 | 773,046 | 796,237 | 820,124 |
| Other Operating Expenses (Revenues) | | | | | |
| Salaries, Wages, Benefits | \$ 1,488,306 | \$ 1,587,111 | \$ 1,692,474 | \$ 1,743,249 | \$ 1,795,546 |

Table 17 – Projected Operating Expenses for 2025 – 2029

Power supply costs from 2025 – 2029 are based on HL&P's current charges adjusted for system growth factors and inflation.

Load Data

Load data is one of the most critical components of a cost of service study. Information from the billing statistics were used to determine the usage patterns of each customer class after reconciling revenues with financial statements to ensure a good basis for development of the study.

Annual Projection Assumptions

The kWh sales forecast is based on FY2023 actual adjusted for growth. Table 18 details growth, inflation of expenses, changes in purchase power costs, interest earned on investments.

| | | | Power | | | Capital | | |
|----------|-----------|--------|-------------|------------|-----|------------|----|------------|
| Calendar | | | Supply Cost | Investment | Imp | provements | | |
| Year | Inflation | Growth | Change | Income | | Plan | In | npact Fees |
| 2025 | 6.6% | 5.0% | 5.2% | 0.5% | \$ | 16,797,000 | \$ | 3,000,000 |
| 2026 | 6.6% | 2.3% | 4.4% | 0.5% | | 14,163,750 | | 3,000,000 |
| 2027 | 6.6% | 4.6% | 3.0% | 0.5% | | 13,869,000 | | 3,000,000 |
| 2028 | 3.0% | 3.0% | 0.5% | 0.5% | | 15,264,000 | | 3,000,000 |
| 2029 | 3.0% | 3.0% | 0.9% | 0.5% | | 25,597,000 | | 3,000,000 |

Table 18 – Projection Annual Escalation Factors 2025 – 2029

System Loss Factors

Losses occurring from the transmission and distribution of electricity can vary from year to year depending upon weather and system loading. The distribution loss factor used for the cost of service study was based on historic losses at 5.5%.

Revenue Forecast

The revenue forecast was based on FY2023 usages adjusted for growth rate assumptions.

6. Considerations and Additional Information

HL&P Financial Considerations

1. HL&P is projected to require increases in rates charged to customers in order to move toward financial targets over the projection period.

| | Projected | Debt | Adjusted | Target | | |
|----------|-------------|----------|--------------|--------------|----------------|---------------|
| Calendar | Rate | Coverage | Operating | Operating | Projected Cash | Recommended |
| Year | Adjustments | Ratio | Income | Income | Balances | Minimum Cash |
| 2025 | 13.0% | 0.80 | \$ 3,625,927 | \$ 4,153,373 | \$ 29,910,394 | \$ 16,570,554 |
| 2026 | 3.5% | 1.37 | 6,877,617 | 4,752,057 | 22,665,931 | 17,202,536 |
| 2027 | 3.5% | 1.42 | 8,059,881 | 5,277,714 | 26,267,715 | 18,271,753 |
| 2028 | 3.5% | 1.67 | 9,418,933 | 5,877,475 | 20,031,791 | 18,575,674 |
| 2029 | 3.5% | 1.59 | 10,676,691 | 6,930,146 | 21,754,979 | 20,113,185 |

- 2. Cash balances fall below the minimum in 2026 and continue to decrease without changes in rates. Projected cash balances are below the recommended minimums during the projection period and HL&P's required minimum cash reserve.
- 3. Debt Coverage Ratio is below the recommended minimum levels throughout the projection period without changes in rates.
- 4. Current rate related revenues are projected to result in the operating income to be below the target for each year. Meeting the operating income target indicates current rates are fully funding system revenue requirements and future replacement cost of current infrastructure.
- 5. Infrastructure of HL&P is newer than the national average. The infrastructure in total is approximately 44% compared with the national average between 50% 55%. This indicates HL&P has newer infrastructure.
- 6. HL&P system losses are average, resulting in average power supply costs for customers. The average system losses and unaccounted for energy for HL&P are approximately 5.5% compared to typical municipal system losses of approximately 5.4%.

Rate-Related Considerations

- 1. The cost-based residential customer charge represents 49% of the fixed cost of delivery of electricity.
- 2. Customer charges are under-recovering for all customer classes. The table below compares the current customer charges with the cost-based customer charge. It is recommended that movements toward the cost-based customer charge occur with the additional revenue used to lower the energy rates for customers in the class.

| | Current Average | | CO | S Customer |
|----------------------------------|-----------------|--------|----|------------|
| Customer Class | Customer Charge | | | Charge |
| Street Lighting | \$ | - | \$ | 896.17 |
| Yard Lighting | | - | | 890.34 |
| Residential Pumping | | 26.00 | | 40.60 |
| Small General Service | | 24.70 | | 47.94 |
| Small General Service Pumping | | 38.50 | | 58.39 |
| Medium General Service | | 145.00 | | 193.93 |
| Medium General Service Pumping | | 145.00 | | 201.81 |
| Large General Service | | 342.00 | | 471.15 |
| General Service Net Metering | | - | | 51.07 |
| Electric Vehicle Charging | | 17.90 | | 22.77 |
| Residential Demand | | 17.90 | | 22.73 |
| Residential Demand over 400 AMPS | | 33.90 | | 39.74 |
| Residential TOU Demand | | 17.90 | | 22.72 |
| | | | | |

- 3. Power Cost Adjustment (PCA) mechanism is proposed to be suspended for the 2025 rate year and reinstated for the 2026 rate year. This will allow HLP to adjust the base rate structures without additional variations in customer bills due to fluctuations in power supply cost.
- 4. HL&P may consider movements toward cost of service. The cost of service study indicates a variance exists between revenues and costs for certain rate classes. The study results are listed below:

| | Cost of | Projecte | d | |
|----------------------------------|------------------|------------|-----|----------|
| Customer Class | Service | Revenue | es | % Change |
| Street Lighting | \$ 156,140 | \$ | - | 0.0% |

| System Equity | \$ | (602,909) | \$ | 10,948,640 | \$ | 12,275,077 | \$ | 25,217,348 | \$ | 30,355,297 |
| Debt:Equity Ratio | | 84% | - | 72% | | 73% | | 63% | | 65% |
| Target Operating Income Allocation | | | | | | | | | | |
| Interest on Debt | | 4.97% | | 5.00% | | 5.03% | | 5.04% | | 5.07% |
| Contributed Capital Estimated | | 3.10% | | 3.10% | | 3.10% | | 3.10% | | 3.10% |
| System Equity | | 5.55% | | 5.40% | | 5.29% | | 5.19% | | 4.97% |
| Target Operating Income | | | | | | | | | | |
| Interest on Debt | \$ | 3,483,701 | \$ | 3,395,826 | \$ | 3,800,733 | \$ | 3,679,667 | \$ | 4,471,457 |
| Contributed Capital Estimated | | 703,110 | | 765,110 | | 827,110 | | 889,110 | | 951,110 |
| System Equity | | (33,438) | | 591,121 | | 649,872 | | 1,308,698 | | 1,507,580 |
| Target Operating Income | \$ | 4,153,373 | \$ | 4,752,057 | \$ | 5,277,714 | \$ | 5,877,475 | \$ | 6,930,146 |
| Projected Operating Income | \$ | 149,716 | \$ | 2,231,081 | \$ | 2,020,426 | \$ | 1,940,607 | \$ | 1,633,266 |
| Rate of Return in % | | 5.0% | | 5.1% | | 5.1% | | 5.1% | | 5.1% |

YES - "Interest on Debt" includes Interest and Principal payments

Second Question – Are recommended rate increases necessary?

| | Sales | Op. Income | |
|---------------|---------------|------------|--------------|
| 2024 | \$27.5 | \$2.4 | |
| Assumptions | | | |
| 27% Price | \$7.4 | \$7.4 | |
| 19% Growth | \$5.2 \$0.5 1 | | 10% of Sales |
| 26% Inflation | na | (\$6.5) | |
| 2029 | \$40.2 | \$3.8 | |
| Volume Les | | | |

| | 2024 | 2025 | 2029 |
|------------------------------|--------|--------|--------|
| Sales Revenue | \$27.5 | | \$40.2 |
| Operating Income B4 Depr. | \$2.4 | | \$3.8 |
| | | | |
| Capital Investment * | | | \$85.0 |
| Bond Debt | | \$47.0 | \$98.0 |
| Average Interest | | \$1.3 | \$4.9 |
| 25 Yr. Average Principal | | \$2.0 | \$3.9 |
| | | | |
| Rate Study Price Increase \$ | | \$3.6 | \$7.4 |
| Rate Study Price Increase % | | 13% | 27% |
| * Approximately ¢COM conita | | | |
| * Approximately \$60M capita | | | |

YES – Based on the aggressive assumptions about (worst case?) growth capital and resultant borrowing

Third Question – Are Costs Equitable for Existing Rate Payers vs. New Property Owners?

| * Impact Fe | ee Equity: | | | | | | |
|--|---|--|--|--|--|--|--|
| \$80M Growt | th Capital adds | | | | | | |
| \$ | \$7M interest and principal | | | | | | |
| \$ | \$4M annual depreciation - future replace | | | | | | |
| Rate study assumes \$3M Impact Fees per year | | | | | | | |
| Recent year | Recent years: 2023 \$4.1, 2024 \$4.9 | | | | | | |
| | | | | | | | |
| ** Bond Pu | Irchase Reduction | | | | | | |
| Model works with \$4.0 Impact Fees and | | | | | | | |
| \$20M bond in 2025, rather than \$25 | | | | | | | |

Could Improve - Possible Mitigation:

| Left With \$98M | | Address | |
|-----------------------|--------|------------|---------|
| \$9M Interest & P | | Rate Payer | |
| | | | Equity? |
| | | | |
| Increase Revenue | | | |
| 27% Rate Increase | | No | |
| Raise Impact Fees \$3 | \$10.0 | Yes | |
| Municipalities Suppo | \$5.0 | Yes | |
| | | | |
| Minimize Bond Del | ot | | |
| Reduce Nonessentia | | Yes | |
| Reduce or Delay Bon | | Yes | |
| Wait until | | | |
| \$22M cas | | | |
| Return Heber Annex | | Yes | |
| note: RMF | Fees | | |

CONCLUSION

Rate study is based on aggressive capital investment for potential growth.

Based on assumed growth and investment, rate increases are correct.

However

Investment will actually be required only as growth demands.

Debt can be minimized by carefully monitoring capital needs and selling bonds:

Only as much as necessary

Only as delayed as possible

Thanks for your time and attention!
