

Dual Fuel Heat Pump

Residential Energy Efficiency Rebate Program

STANDARD TERMS AND CONDITIONS

Dual fuel technology combines the efficient heating and cooling performance that you get from a heat pump with the consistent heating capacity of a gas furnace. In summer, the heat pump works like a high-efficiency central air conditioner. In spring, fall, and winter it provides cost-effective and efficient heating, while the gas furnace takes over only when needed during the coldest months of the year.

Requirements and Qualifications

- Must be an existing home, not new construction.
- One unit per home. Upon approval, additional heat pumps may qualify.
- Wood heating, pellet stoves, evaporative coolers, and room air-conditioners conversions do not qualify.
- Minimum AFUE (Annualized Fuel Utilization Efficiency), HSPF (Heating Seasonal Performance Factor), and SEER (Seasonal Energy Efficiency Ratio) ratings as listed in rebate table.
- Work must be completed by a qualified HVAC contractor.

- Dual fuel heat pump must be a new AHRI (Air Conditioning, Heating, and Refrigeration Institute) rated, air-source split or packaged unitary heat pump.
- Dual fuel heat pump must be listed on the AHRI Certified Directory: ahridirectory.org
- Previous primary heat source must have been the same as the unit being installed (e.g., gas to gas, electric to electric).
- Must submit completed application.
- Itemized receipt or contractor invoice.
- Application must be received within 180 days of installation.
- Must be a Heber Light & Power customer.
